Tata Motors to supply EVs to Cognizant

Tata Motors has announced that it will supply Tigor EVs to Cognizant. The latter will deploy the cars in its Hyderabad campus as part of its commitment to a sustainable environment. Tata Motors has partnered with Volercars to deliver this integrated solution with value-added services to Cognizant, including on-ground operations and fleet management.

Flextronics to set up manufacturing unit in Andhra Pradesh

Andhra Pradesh government has signed an MoU with Flextronics Technologies India Pvt Ltd, the Indian subsidiary of the multinational Flex, to establish a unit at Sri City near Tirupati in Chittoor district, reported *The Hans India*. The unit for cellphone components production is expected to start production from August 15, 2018. Along with Flextronics Technologies, its ecosystem partners will also move to the state.

Philips India set to turn fully private

Philips India has asked National Company Law Tribunal (NCLT) to buy its 2,227,000 shares held by non-promoter public shareholders, at ₹ 560 per share. This buyout scheme has been filed under Section 66 of Companies Act as capital reduction.

iVOOMi to manufacture wearables in India by end of 2019

Device-maker iVOOMi, which entered the Indian market in March 2017, will be shifting its entire wearables manufacturing to India by the end of 2019, reported *ET Telecom*. It is aiming for an Indian market share of around seven per cent by March 2019 and 10 per cent by the end of 2019 in the wearable space. Ashwin Bhandari, chief executive officer, iVOOMi India, said that, by the end of 2019, the company will create its own market by penetrating Tier-2 and 3 cities, which have remained untapped so far. He added that, by 2019, iVOOMi will invest US$ 30 million in wearables, for R&D, manufacturing, marketing and sales.

Microsoft acquires AI startup Bonsai

Microsoft has signed an agreement to acquire Bonsai, an artificial intelligence (AI) startup based in San Francisco, to boost its AI and machine learning capabilities. As per the company statement, the acquisition is another major step towards its vision to make it easier for developers and subject matter experts to build a machine learning model for autonomous systems of all kinds.

Bosch eyes ₹ 17 billion investment in the IoT and AI

Bosch will invest ₹ 17 billion in India over the next three years as it leverages opportunities in both electric and diesel vehicles, and also transitions into a technology company by focusing on the Internet of Things (IoT) and AI, reported *Hindu Business Line*. In line with this change, Adugodi plant in Bengaluru is being revamped from a manufacturing facility into a technology hub with investments of ₹ 3.7 billion made over the last three years.

Smartphone maker HTC to exit India

Taiwanese smartphone maker, HTC is quitting the Indian smartphone market, which has become extremely competitive over the years, thanks to Chinese players like Xiaomi, Huawei, Oppo and Vivo, among others. According to *Economic Times*, three executives, namely HTC India head Faisal Siddiqui, sales head Vijay Balachandran and product head R. Nayyar have put down their papers. However, its chief financial officer Rajeev Tayal has been asked to stay put. Nearly 70 to 80 employees of HTC India were asked to leave the company.

will leverage its extensive sales network and brand.

Xiaomi India, Dixon to make Xiaomi TV sets locally

Chinese smartphone manufacturer Xiaomi has partnered with Indian consumer electronics contract manufacturer Dixon Technologies to make about 55,000 TV sets locally, every month.

Xiaomi is expected to make 81.28cm and 109.22cm sets through this arrangement, which may later be expanded to include newer models. As part of the Xiaomi-Dixon deal, local production will be done taking the open cell route. This means that the company will import TV panels in the open cell state, and these will require assembling before these are ready to be used to make the TV sets.

Nokia, Huawei to shift focus from telecom

Telecom companies Nokia and Huawei are trying to look beyond the traditional telecom service provider business to gain revenue in India. On the other hand, Ericsson continues to focus on being the telecom service provider as its global strategy.

Rajiv Suri, chief executive officer, Nokia, indicated that Nokia is open to acquire companies to grow its enterprise business just like it acquired Alcatel-Lucent, which gave it an opportunity to go beyond the telecom business.

Huawei has fixed its focus on the Indian smartphone market to increase its revenue. A Huawei spokesperson said, "India has always been a key market in Huawei's global strategy. In India, we are recording even faster than the overall global growth rate, having gained over 500 customers and partners."

"We can develop connectivity, whether it is for mobile broadband or for smart manufacturing, smart agriculture and smart cities. We have growth opportunities here. We tried to spread ourselves in different areas before, but it was very hard to keep that together, so instead, we started focusing on just connectivity," Borje Ekholm, president and chief executive officer, Ericsson, told *Economic Times*.
