“Our **INDOOR SOLAR CELLS** Help Indoor IoT Devices **WORK WELL...**”

Solar cells that work indoors? They have been in digital watches and calculators. But, this category seems to be undergoing a revolution now. Epishine, a Swedish firm, claims to enable a whole new set of indoor IoT devices powered by their organic solar cells. Electronics For You's Nidhi Agarwal spoke to Jonas Bergqvist, Chief Technology Officer at Epishine, and here is what she found out...

**JONAS
BERGQVIST**
CHIEF TECHNOLOGY
OFFICER, EPISHINE
