India's AI Market to Reach \$17 billion by 2027

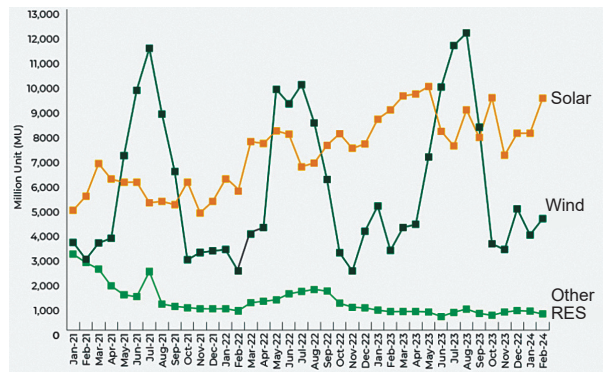

India's AI/ML job market grew by 15%, with AI Engineer positions increasing by 70%, last year. The Indian AI market is expected to reach \$17 billion by 2027, with AI talent demand to grow at a 15% CAGR. Improved data engineering practices, powerful AI chips, optimised algorithms, and user-friendly interfaces are driving this growth. India ranks fifth globally in AI investments, receiving around \$4 billion in 2022-23.

India RE Generation Rose by 15.5% in February, \$500 million Invested

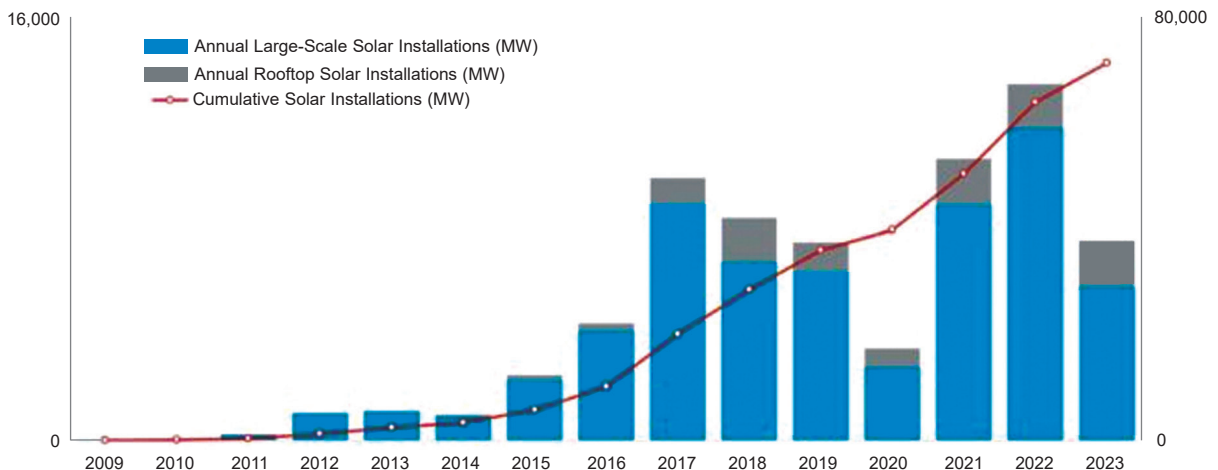

In February 2024, renewable energy (RE) generation in India reached 14,580 million units, a 15.5% increase from January 2024. The sector raised \$500 million during the month. Solar and wind generation rose by 17.7% and 16.9%, respectively. In January 2024, the country added 1020MW of solar capacity and 233MW of wind capacity. Solar energy accounts for 41% of the country's 182GW RE capacity, followed by large hydro (26%) and wind (24%). Maharashtra led in solar installations with 624MW, while Karnataka added the most wind capacity at 272MW.

India's Solar Capacity Installation Down by 44.1%, Delayed Projects to Add to 2024 Installations

In 2023, India's solar capacity installations decreased by 44.1% to 7.5GW, with solar power contributing 48.5% to new power capacity additions. The slowdown was due to project delays caused by land and transmission issues, leading to extensions for large-scale solar and hybrid power projects. Module oversupply in China resulted in a decline in solar module prices. Large-scale solar installations dropped by 50.8% YoY to 5.8GW.
