

Experiencing challenges with SMT Mounters that limit component size flexibility?

Your solution to versatile component handling- **Juki RS-1R!**

From tiny 0201 metric components to large connectors & ICs, the **RS-1R** effortlessly handles it all, ensuring optimal production efficiency and reducing downtime!

WHY CHOOSE JUKI RS-1R ?

- Integrated Laser Sensor and high-accuracy camera ensure seamless operation with real-time component recognition.
- Achieve unparalleled productivity with a remarkable throughput of 47,000 components per hour (CPH).
- From 0201 metric components to large connectors & ICs, the RS-1R is your all-in-one solution, ideal for LED placement.
- The Takumi Head guarantees flawless placement, adjusting to component sizes with unmatched accuracy.
