

THE DASHBOARD

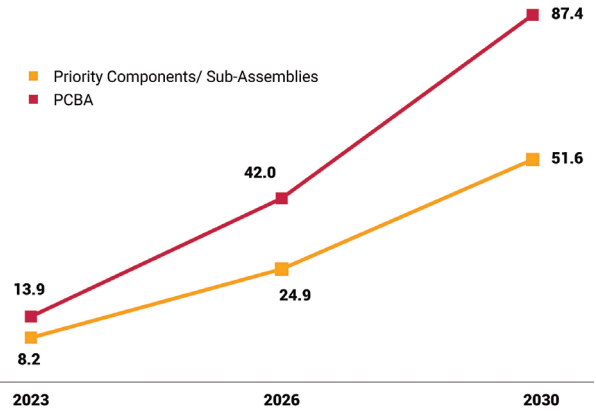

India's Electronics Demand Will Touch \$500B by 2030

India's electronics manufacturing sector may grow from \$102 billion in 2023 to \$500 billion by 2030, with PCBAs reaching \$139 billion due to a 30% CAGR. Increased local value addition, improved import tariffs, and government support for scaling assembly activities will boost the sector. Components like lithium-ion batteries and PCBs must be produced domestically, reducing import dependency and enhancing supply chain.

High Priority Component/Sub-Assemblies Opportunity (US\$ billion)

Indian PC, Tablet Market to Surge by 15% in 2025

The Indian PC and tablet market is projected to grow 11% in 2024 and 15% in 2025. In Q1 2024, it expanded 9% YoY to 4.3 million units, driven by solid demand and government tenders. Tablets surged 37% to 1.3 million units, desktops rose 9% to 938,000 units, and notebooks fell 4% to 2 million units. Local efforts by government and manufacturers are boosting the industry's growth.

Indian Wearable Market Grows 2.1% Despite Decline in Smartwatch Sales

In 1Q24, India's wearable device market saw a modest 2.1% growth year-on-year, reaching 25.6 million units, despite declining smartwatch shipments. Earwear grew 8.3% YoY to 15.9 million units, with Truly Wireless Stereo (TWS) devices holding a 70.1% share. Leading vendors included BoAt, Noise, Fire-Bolt, Boulton, and Oppo, though their market share slightly decreased. The offline channel's share rose to 37.9%, while online shipments fell 14.1% YoY.

Product Category	1Q 2023 Shipments (thousands of units)	1Q 2024 Shipments (thousands of units)	1Q 2023 vs 1Q 2024 Growth
Wrist Band	34.3	40.4	17.5%
Smartwatch	10,379.5	9619.9	-7.3%
Earwear	14,656	15,875.6	8.3%
Others*	0.1	68.8	46,399.3%
Total	25,069.9	25,604.6	2.1%

*Includes Smart Rings and Smart Glasses
