MeitY considering proposals for semiconductor and display fabs and ATMP facilities

The Ministry of Electronics and Information Technology (MeitY) plans to approve OSAT (outsourced semiconductor assembly and test) and ATMP (assembly, testing, marking, and packaging) facility proposals soon, supported by ₹760 billion allocated to the Indian Semiconductor Mission (ISM). The ministry has received applications for seven semiconductor fabs, three display fabs, and sixteen ATMP facilities. Additionally, a tender for GPUs will be issued to enhance AI infrastructure. MeitY is also expected to seek additional funds for future fabs.

Defence ministry allocates \$3 billion to promote 'Make in India'

The Ministry of Defence has allocated over \$3 billion through its Technology Development Fund (TDF) to boost domestic defence innovation, targeting MSMEs and startups. Managed by the DRDO under the 'Make in India' initiative, the

fund supports military technology development and aims to enhance India's R&D capabilities. Notable projects include simulators for uncrewed vehicles and virtual sensors for engine health.
