Global Sensor Market to Hit \$253B by 2035

The global sensor market is expected to reach \$253 billion by 2035, growing at a 6% CAGR, driven by artificial intelligence, 6G, and electric mobility. Technologies like semiconductors and optical sensors will dominate the market by 2025. Innovations in autonomous vehicles, IoT, wearables, and emerging quantum sensor technology will fuel demand, especially in healthcare, automotive, and industrial automation sectors.
