

Syrma SGS opens electronics manufacturing unit in Pune

Syrma SGS has inaugurated a 26.5-acre electronics manufacturing facility in Pune, expanding its PCB assembly capabilities to meet rising demand, especially in the automotive and industrial sectors. The facility, with a 111,484 square metres capacity, will create 1000 jobs and strengthen the company's competitiveness in the global ESDM sector.

Nvidia to supply AI chips to Indian data centre firms

Nvidia will supply its Blackwell AI processors to Reliance Industries for a one-gigawatt data centre Reliance is building in the western state of Gujarat. Chief Executive Jensen Huang and Mukesh Ambani announced the news at an AI summit in Mumbai. Nvidia said it also plans to supply tens of thousands of its Hopper AI chips to build large-scale data centres, in an expansion led by firms such as data centre provider Yotta Data Services and Tata Communications.

Cyient invests \$7.25 million in fabless Azimuth AI

Cyient has acquired a 27.3% stake in fabless company Azimuth AI for \$7.25 million, aiming to strengthen its position in the semiconductor market. This move is likely to boost ASIC chip development in India for global markets, focusing on energy-efficient systems. Cyient's acquisition strategy continues with two additional deals this month in the tech and manufacturing sectors.

Hisense and EPACK partner for AC manufacturing in Andhra

Hisense has partnered with EPACK Durable Limited to establish a production facility in Sricity, Andhra Pradesh, focused on air-conditioners and home appliances. Set to begin operations in June 2025, the plant aims for 1 million room ACs by FY 2027-28, using eco-friendly manufacturing practices and targeting both

domestic and international markets. The collaboration is expected to generate \$1 billion in revenue over five years.

Sahasra and Taiwan's InnoCare team up for X-ray panel production

Sahasra Electronic Solutions has partnered with Taiwan's InnoCare Optoelectronics to manufacture flat panel detectors for X-ray equipment. This collaboration merges Sahasra's electronics design capabilities with InnoCare's specialisation in X-ray sensors. The partnership aims to capitalise on an estimated \$15 billion opportunity for Taiwanese firms across various sectors in India's thriving local end-to-end manufacturing efforts.

India and Kazakhstan convene for stronger ties in electronics

India and Kazakhstan convened a major business conference focused on electronics equipment and engineering goods with nearly 50 companies from both nations participating. The Indian Ambassador Dr T.V. Nagendra Prasad, emphasised the alignment between India's electronics capabilities and Kazakhstan's digital transformation goals, by highlighting potential collaborations in manufacturing, software development, and IoT solutions.

DroneAcharya and Krattworks partner for local defence capabilities

Pune-based DroneAcharya has partnered with Estonia's Kratt-

SNIPPETS

- GaN tech startup Agnit secures \$3.5 million in seed funding
- India and Germany unite at NXP's Semiconductor Roundtable Event
- Singapore chosen as Tata's partner for semiconductor projects
- KeenSemi partners with VLSI expert to upskill engineers
- Strike ends at Samsung's Tamil Nadu facility
- Cellecor Gadgets expand retail horizons across South India and Gujarat
- Haier and JSW plan ₹10 billion JV in India targeting Indian consumer electronics market
- SECI to bid for State RE projects, eyeing \$7.7 billion Investment
- IIT Bhubaneswar partners with MOSart Labs to boost chip industry skills

works to facilitate local production and distribution of the Estonia-based company's defence drone products. This collaboration will enhance DroneAcharya's offerings with advanced ISR drones featuring anti-jamming and night vision capabilities. The partnership strengthens India's defence sector, complementing DroneAcharya's existing work with the Indian Army and expanding its drone training initiatives.

Power electronics startup CastNX secures ₹232 million

Indian power electronics startup CastNX has secured ₹232.2 million from Plutus Investments to accelerate R&D and production of energy-efficient solutions. The investment will help CastNX expand its team, establish a world-class production facility, and produce 100,000 variable frequency drives (VFDs) by 2026. CastNX specialises in VFDs for industrial, aerospace, and electric vehicle applications.

Bengaluru's Sarla Aviation to launch electric flying taxis soon

Bengaluru-based Sarla Aviation plans to launch electric flying taxis to ease traffic congestion and reduce pollution. Partnering with Bengaluru International Airport, they aim to offer 19-minute airport trips, cutting down on travel time and costs. Targeting Bengaluru, Mumbai, Delhi, and Pune, the service could start within three years, pending regulatory approval.
