

An IOS 9001:2015 certified company

About **EMBTech Innova**, we are a team of Engineering and Management professionals, with comprehensive experience & skills sets in embedded design. We embrace innovative approaches to realize customer's ideas / concepts / localization endeavors with minimal risk.

We exclusively offer design services encompassing Hardware, Embedded Software, and Mechanical aspects. Our expertise extends to providing comprehensive manufacturing support, ensuring a seamless transition from design to production. Trust us for end-to-end solutions, as we bring innovation and precision to every stage of your product development journey.

The Smart Charging Socket

Introducing our Smart Socket EV Charging Solutions for on-the-go convenience! Choose from our versatile options: the Three-Socket Charge Point or the Single-Socket Charge Point, both delivering a robust 220V, 15A (3.3kW) power output. With 2G communication (upgradeable to 4G) and BLE 3.0 (upgradeable to 5.0), stay connected effortlessly. Our devices boast an impressive 1% accuracy

in measuring Voltage, Current, Power Factor, and Energy consumption, ensuring precision in every charging session. Experience reliable, efficient, and data-accurate EV charging with our cutting-edge solutions.

EI-KLE Vehicle Tracker and Control Unit

Introducing EI-KLE, the Embtech Innova Keyless Entry system for 2-wheeler EVs. Operating at 48V, it seamlessly controls vehicle ignition, wheel lock, and seat lock operations with Embtech's custom lock, providing accurate seat position feedback. Equipped with 4G communication and BLE 5.0, it ensures robust connectivity. Tested for GPS accuracy within a 10-meter range, it features vehicle fall detection, unauthorized seat breakage detection, and more. With EI-KLE, enjoy comprehensive

control and tracking for your EV 2-wheeler, making it the ultimate solution.

"Exclusive 2G and 4G trackers are also available, ensuring precise 10-meter accuracy for reliable vehicle tracking."

10.1-Inch HMI Device

Introducing our advanced 10.1-inch touch Human Machine Interface (HMI) device, powered by Android 5.1, designed for seamless interaction in 24V/12V industrial settings. The responsive touchscreen ensures user-friendly control. Affordable and

efficient, it's an ideal solution for diverse automation applications. Explore processor-based solutions for infotainment and POS devices, featuring IMX6, IMX7, and IMX8 with DDR3 memory options. Boasting 4GB flash, integrated codecs, and MIPI interfaces, this device offers enhanced performance and seamless display-camera integration. Elevate your automation experience with our comprehensive solutions, meticulously designed for efficiency and versatility.

Home Appliances Solutions

Water Purifier Controller
BLDC Smart Fan

Other Solutions:

- Wrist Bands
- BT Audio devices
- NFC2BLE device
- Smart spray
- BLE thermometer
