Solar Installation Saw 28% Decline in 2023, Increased Tenders Indicate Future Growth

India recorded a total renewable energy (RE) capacity of 133.89GW in December 2023. Solar energy, contributing 55%, is the largest segment in India's RE mix, followed by wind (33%), BioPower (8%), and Small Hydro (4%). From January to December 2023, India added approximately 10,016MW of solar and 2806MW of wind capacity. Solar installations decreased by 28%, but wind installations rose by 52% compared to 2022. Decrease in solar installation is attributed to low tender activity from 2020 to 2022, although an overall upsurge suggests future growth in this sector.

Display Fab Usage to Fall Below 68% in Q1 2024, Early-Year Demand Slowdown

Overall utilisation of display fabs is expected to drop below 68% in Q1 2024. This reduction is partly due to early-year demand slowdown and strategic moves by panel makers to protect LCD panel prices. An Omdia report indicated a significant shift in the display panel industry, particularly in the LCD TV display segment.

E-Bus Sales in India Surged 300% YoY

In December 2023, the total number of electric buses sold amounted to 577 units, marking an approximate 12% month-on-month increase. Compared to December 2022, the year-on-year sales of electric buses in December 2023 surged by over 300%. Tata Motors led with 61.18%, followed by JBM Auto at 23.74%, Olectra Greentech with 11.96%, Mytrah Mobility at 1.21%, PMI Electro Mobility holding 1.04%, Switch Mobility at 0.69%, and Pinnacle Mobility at 0.17%.
