

model, underscoring community support in establishing OSAT operations in India.

BEL, IIT Delhi partner for deep tech research for Indian Navy

Navratna Defence PSU Bharat Electronics Ltd (BEL) has partnered with the Foundation for Innovation and Technology Transfer (FITT) at IIT Delhi. This collaboration aims to translate breakthroughs in Naval Deep Tech research at CARE – IIT Delhi into products for the Indian Navy. BEL has expressed keen interest in engaging in partnerships related to naval electronic systems, covering areas such as RF, sonar systems, IMARS, and communication systems.

Tata Group to build semiconductor plant in Gujarat

Tata Sons chairman Natarajan Chandrasekaran announced that the company will establish a large semiconductor fab in Dholera, Gujarat. Negotiations are on the verge

Representational image

of completion, and the fab is set to commence operations in 2024. Tata Group also plans to start the construction of a 20-gigawatt lithium-ion storage battery factory in Sanand city, Gujarat, within two months.

Honda eyes India for compact electric SUV exports in Asia

Honda Cars India, focusing on exports as a pivotal strategy for the

growth of its internal combustion engine SUVs, is transitioning to become a hub for electric vehicles with its new initiative 'ACE'. The ACE project, standing for "Asian Compact Electric," is expected to be operational by 2026. It is anticipated that 50 to 70% of the vehicles manufactured in India will be exported to major international markets, including Japan. The company has expressed its intentions to use India as a base for future export operations.

Sun Stellar join hands with DRDO-DIHAR Lab to build solar space heating project in the high altitudes of Ladakh

Sun Stellar, an Indian solar technology brand, recently partnered with DRDO-DIHAR Leh Lab to create a solar space heating system using unique technology. A pilot project was initiated in December 2023, and an expanded system for the ADM Block followed in December 2024.

This system, which heated two rooms accommodating 8-9 soldiers to +20 degrees Celsius nightly, has been running maintenance-free for over a year, replacing traditional diesel boiler heating.

Himachal Cabinet decides to start solar project for youth startup scheme

The Himachal Pradesh Cabinet recently announced a plan to commence the Rajiv Gandhi Swarnajayanti Start-Up Yojna, Phase (II) for setting up solar power projects of 100 to 500kW. Through this scheme, participants (21 to 45 years old) will have the opportunity to earn around ₹20,000 monthly for 25 years for a 100kW installation on three bighas of land. For projects with a capacity of 200kW and 500kW, to be set up in five and ten bighas of land respectively, participants will earn ₹40,000 and ₹100,000 per month respectively.

VW Group kicks off PEAK EV project for India, mainstream e-SUV likely by 2026

After extensive research in the electric vehicle sector, the Volkswagen Group has initiated the localisation of its electric vehicle in India with the PEAK EV project. This initiative is expected to produce multiple vehicles from 2026. The first SUV EV, expected to carry the Volkswagen badge, aims for an initial production of 50,000 units for both domestic and international markets. This marks a major shift for the German brand towards all-electric vehicles in India.
