

“CHALLENGES Are The Biggest ‘Change And Improve’ POINTS IN LIFE”

VINEET SAHNI
FIEM INDUSTRIES

“Challenges are important to move ahead in life. The choice to take on a challenge is always personal. The question of whether I will be able to overcome it or not will always be there. The best we can do is to face them head-on and not worry about the result,” says the man who has become one of the most prominent leaders in India’s automotive components and lighting landscape.

He learned the distinction between “people giving respect to a position and people giving respect to a person” while studying in the sixth standard. He then challenged the top student in his class (ninth standard) to surpass him academically within a year and succeeded by topping the tenth Board. He later took on the challenge of elevating his company to become one of the most respected automotive electronics and components companies in India. Presently, he is working towards establishing FIEM Industries on the global automotive lighting map while concurrently fostering self-reliance in India across various sectors where he plays a role. This is Vineet Sahni’s story, as narrated to EFY’s Mukul Yudhveer Singh!
