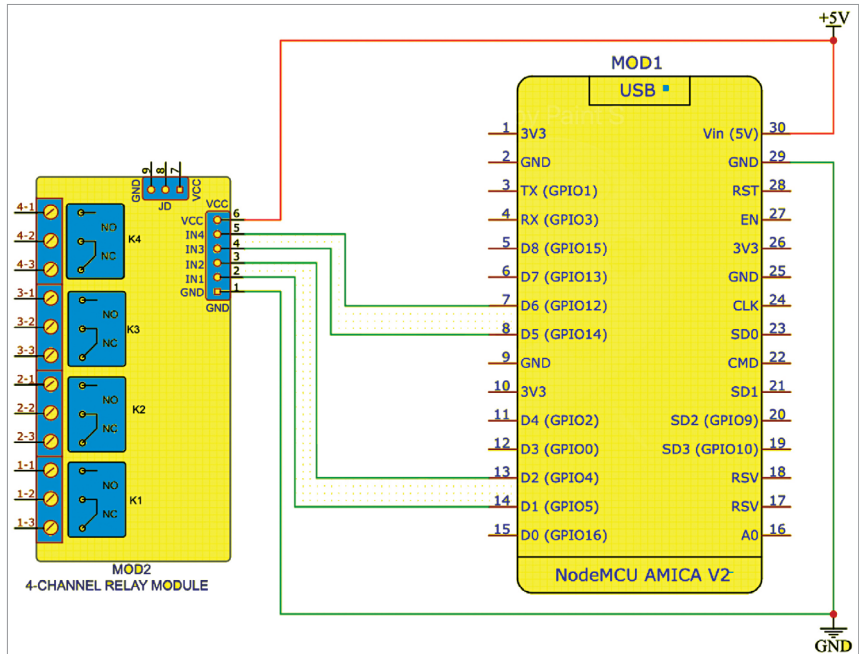

Fig. 2: Circuit diagram

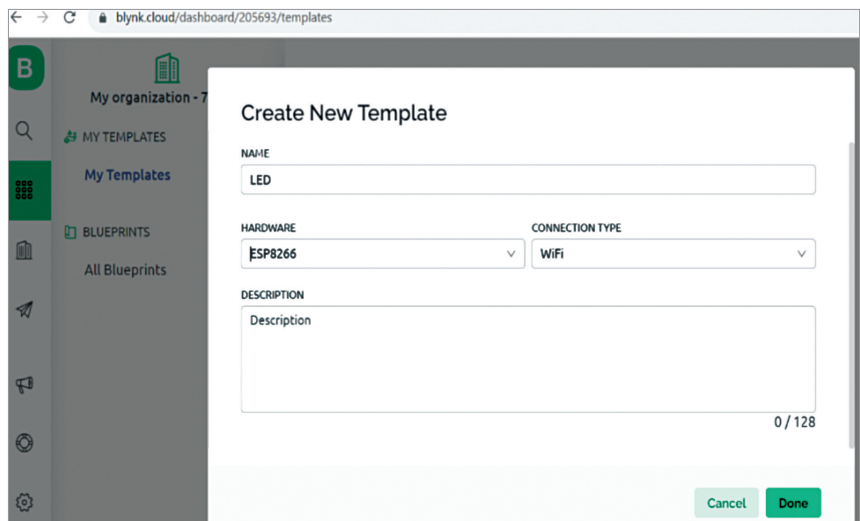

Fig. 3: Blynk creating template

Fig. 3 shows Blynk creating a template, while Fig. 4 shows Blynk web dashboard adding components.

Step 3. From the Widget Box, drag a switch and slider as per the application requirement (we need switches). Click on switch setting (refer to the arrow mark). In Switch Setting, create a DataStream for the switch, name it 'Fan,' select Pin V0 for the fan switch, and click

on Save. Fig. 5 shows the Blynk dashboard, and Fig. 6 shows Blynk switch setting.

After saving, set the parameters as per the snippet shown in Fig. 9. Repeat steps 1 to 3 for the second switch, only changing the Name to 'Light' and Pin to V1. Fig. 7 shows Blynk giving switch names.

Once the template design is complete, add it to the system, select
