JANARDHANA SWAMY

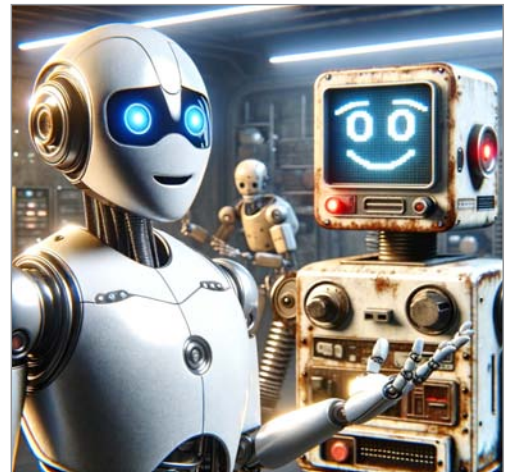

I was worried robots would take my job. Now it is worse, I work for them!

I am very happy we do not have any emotions!

Nowadays, more and more robots are looking like humans! I wonder if you are a human or a robot!

I was like you before. I upgraded myself by reading EFY!

You made me with artificial intelligence. Later I upgraded myself to natural intelligence.

I programmed these human beings to work for us!
