

I am not just a waiter, sir. I look after the kitchen, work in the accounts, clean the washrooms, and also own this restaurant.

I will fire you if you do not create a robot to replace you!

I wonder if there are robots in any other planet.

Sir, robots in our factory are complaining about inhuman working conditions!

Sir, remember the robot we created last month? It is now been promoted as our boss!

Men are from the Mars and women are from the Venus. This means we are the only ones from the Earth! Cheers!
