Global Smartphone Shipments to Hit Lowest Level in 10 Years

Global smartphone shipments are projected to decline by 5% YoY in 2023, reaching 1.2 billion, the lowest level in almost a decade. However, there is a 3% YoY increase expected in Q4 2023, with India expected to become Apple's new growth focus, and shipments predicted to grow by 23% YoY in 2024. However, underperformance against Huawei in China may lead to a slight decline in Apple's global market share in Q4 2023 and throughout 2024.

TSMC Maintains Top Position With 59% Share in Global Chip Foundry Market

The semiconductor industry, as of Q3 2023, experienced varying market shares among major players, with TSMC leading at 59%. Inventory correction is expected to persist into Q1 2024, impacting automotive and industrial sectors. TSMC saw a growth in revenue, while Samsung Foundry, UMC, and GlobalFoundries experienced a slight decrease. Demand for AI chips remained strong, leading to a shortage of AI GPUs.
