ties to retain the current 100% import taxes on EVs, amid the government's plans to reduce EV import taxes to a minimum of 15% for firms pledging some local production. This move could enable Tesla to establish an Indian factory for its planned \$24,000 car and import its higher-end models at reduced taxes. Tata emphasised the need to protect the domestic industry and its investors, as the government considers Tesla's entry into the Indian market. Currently, the 100% EV import tax applies to cars priced over \$40,000, affecting most Tesla models. Tata's EV range is priced between \$10,400 and \$24,000.

Mitsubishi Electric opens ₹2200 million advanced factory automation plant in Maharashtra

Mitsubishi Electric India has inaugurated a new facility for Factory Automation Systems in Talegaon Industrial Area, Maharashtra, with an investment of ₹2200 million. This facility specialises in producing advanced automation systems and spans an area of 40,000 square metres, with an initial construction of 15,400 square metres. This factory will enable the local manufacturing of Mitsubishi Electric's global product range.

Foxconn to invest \$1.5 billion in Indian construction project

Foxconn plans to invest over \$1.5 billion in a construction project in India to address its operational needs. The investment will be channelled through Foxconn's subsidiary, Hon

Hai Technology India Mega Development, which has been operating in Maharashtra state since 2015, as per the filings and Indian corporate records.

Bharat Electronics bags orders worth ₹39.15 billion

Bharat Electronics Ltd (BEL) has secured orders totalling ₹39.15 billion for supplying various defence equipment. Out of this, the Indian Army has placed an order worth ₹5.80 billion for artificial magnetic conductors used in radars. The company's order book for FY24 stands at ₹182.98 billion. This includes orders worth ₹30 billion received in September for various defence equipment, with a significant portion (₹21.18 billion) coming from Cochin Shipyard Ltd.

Padget Electronics bags Lenovo's manufacturing contract

Padget Electronics, a wholly owned subsidiary of Dixon Technologies, has entered into a manufacturing contract with global technology giant Lenovo, making Padget the chosen manufacturing partner for Lenovo's IT hardware, especially notebooks and laptops. This agreement resulted from Lenovo's participation in the government of India's production linked incentive PLI 2.0 scheme for which both Lenovo and Dixon were selected.

IndiGrid collects ₹6.7 billion via institutional placement

IndiGrid, the first publicly listed power sector Infrastructure Invest-

ment Trust in India, accomplished a successful institutional placement (IP), raising ₹6.7 billion, and witnessed participation from existing and new domestic as well as international institutional investors. The funds raised through this IP contribute to IndiGrid's total equity funds for FY24. The IP, initiated on December 5, 2023, comes on the heels of IndiGrid's September 2023 preferential issue, which yielded over ₹4 billion. The cumulative equity funds raised now stand at approximately ₹10.7 billion.

Sahasra Electronics to set up semiconductor packaging facility in Bhiwadi

Sahasra Electronics plans to invest ₹3.5 billion over the next three years to establish a semiconductor packaging facility in Bhiwadi. The investment is part of the Make in India initiative and focuses on cutting-edge packaging and testing operations for NAND flash memory. Significant funds have been allocated for machinery for electronic assembly and infrastructure development. The initiative aligns with the Indian government's PLI scheme incentive, which Sahasra received in 2020.

Siemens to boost stake in Indian joint venture with 2.1 billion Euros acquisition from Siemens Energy

Siemens AG plans to increase its stake in the Indian joint venture with Siemens Ltd by acquiring an 18% stake from Siemens Energy for Euro 2.1 billion, resulting in Siemens AG's ownership rising from 51% to 69%, while Siemens Energy's stake diminishes from 24% to 6%. The move is part of Siemens AG's strategy to support Siemens Energy AG and expedite the separation process in India. The strategic purchase is at a discounted rate, with a 15% reduction applied to the average price over the five trading days preceding the agreement.
