

THE DASHBOARD

India's Smartphone Market Records 18% YoY Value Growth

India's smartphone market in Q1 2024 saw significant growth, with 18% year-on-year (YoY) increase in value and 8% YoY increase in volume. Vivo and Xiaomi emerged as the leading brands with a 19% market volume share each, closely followed by Samsung at 18%. 5G smartphones reached a record 71% share in volume. The premium segment (>₹30,000) achieved its highest-ever 20% volume share. Offline sales constituted 64% of the market, the highest since the Covid-19 pandemic.

Southeast Asia Smartphone Shipments Rebound to 12% YoY Growth in 1Q24

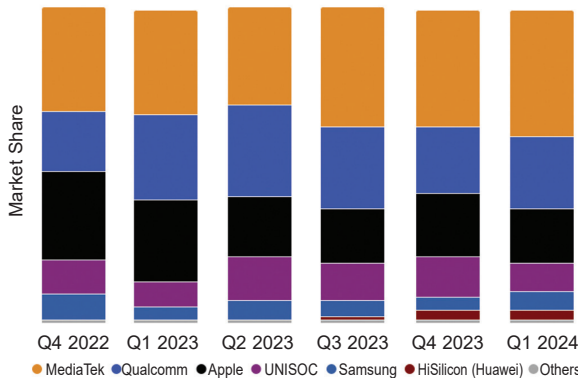

The Southeast Asian smartphone market showed a 12% year-on-year growth in Q1 2024, reaching 23.5 million units, driven by improved inventory levels and consumer sentiment. Samsung maintained its lead with a 19% market share but experienced a 20% decline in volume year-on-year. Price-sensitive markets saw a revival in the sub-US\$100 segment, driven by increasingly affordable devices with enhanced specifications. Long-term prospects remain positive due to the region's young population and increasing digital financial services, driving demand for premium devices.

MediaTek Leads Global Smartphone AP-SoC Market Share in Q1

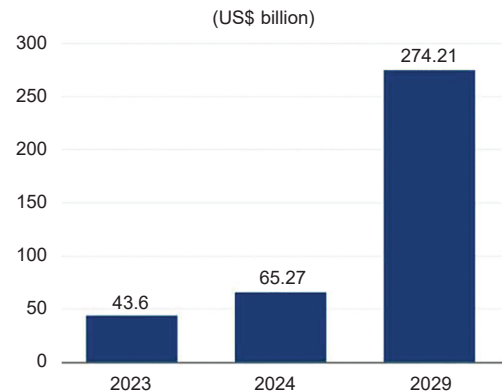

MediaTek led the global smartphone application processor (AP-SoC) with 40% market share as of Q1 2024, followed by Qualcomm and Apple, despite fluctuations in their quarterly shipments. The chipmaker consistently gained market share, reaching 40% in Q1 2024 from 33% in Q4 2022, while Qualcomm fluctuated between 19% and 29%, with a slight decline to 23% in Q1 2024, due to Snapdragon 800 series slowdown and competition from Samsung. The latter's share fluctuated between 4% and 8%, ending at 6% in Q1 2024, following increased shipments with new Exynos 2400 and Galaxy A25 series launches.

Global GPU Market to Reach \$274B by 2029

The global Graphics Processing Unit (GPU) market is anticipated to reach \$274 billion by 2029, with a compound annual growth rate (CAGR) of 33.2%, driven by increasing demand for GPUs in PCs, mobile devices, and advancements in AI technology. As of now, the GPU market is valued at \$65.27 billion, up from \$43.6 billion in 2023. The surge in 5G subscriptions is expected to further drive GPU sales, especially in mobile devices. India, Japan, and South Korea lead the market, driven by technological innovation and gaming sector expansion.
