customers, aiming to boost adoption in residential and commercial sectors. The partnership includes tailored loan facilities facilitated by NetZero Finance, Aerem's financial arm. Panasonic targets sales exceeding ₹5 billion through this partnership. Aerem Solutions, parent company of NetZero Finance, brings expertise in solar technology and finance, having enabled over 350MW of solar capacity.

HCLTech and ARM partner on AI silicon chips for business

HCL Technologies (HCLTech) and ARM are collaborating to develop customised silicon chips aimed at enhancing AI-driven business operations, particularly targeting data centres. HCLTech will use ARM neoverse compute subsystems (CSS) to reduce development risks and expedite delivery of AI solutions. The partnership will enable semiconductor manufacturers, system OEMs, and cloud services providers to enhance the computing efficiency of their data centre environments.

Altium invests in India through Bengaluru office

Altium, an IT firm, is making substantial investments to expand its presence in India, focusing on enhancing both digital and physical infrastructure, particularly through its Bengaluru office. Altium's move aligns with broader trends of IT firms increasing their footprint in India due to its skilled workforce and conducive business environment.
