RG LCD DISPLAYS

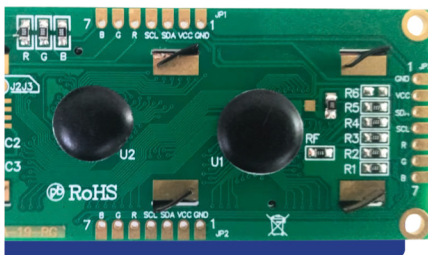

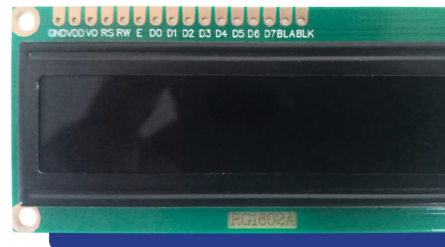

Liquid Crystal Displays (LCDs) are essential for presenting information through pixel arrangements.

Our selection includes various sizes such as 8x2, 16x1, 16x2, 16x4, and 20x4, and comes in Blue, Green, Black and White colors.

16x2 Display
(RGB)

16x2 Display
(BLACK)

16x2 Display
(In-built I2C)

We are excited to unveil our latest innovation: RGB character displays with an I2C interface. This simplifies the connection process to just 4 pins (VCC, GND, SDA, SCL), reducing complexity from the traditional 16-pin setup. Our new lineup features a 16x2 RGB display with I2C connection, as well as standard RGB displays. This advancement makes setup easier and enhances functionality.

Highlights of ADIY UNO KIT

- Great for Starting with UNO Programming
- A variety of components are included in this pack to try out different projects.
- The kit comes with quality components manufactured In-house by ADIY
- All-in-one kit, a great starter kit for learning to code.
