JANARDHANA SWAMY AND NEHA J.S.

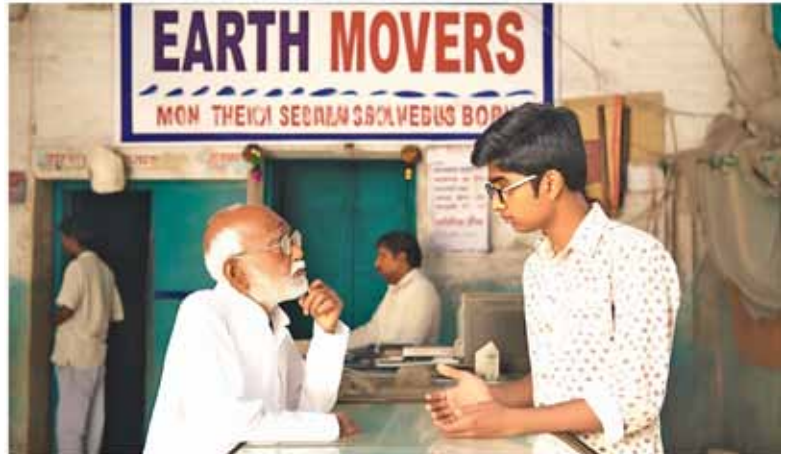

On a spiritual note, I just realised we are just a bunch of atoms talking to each other!

I finally figured out how to install Python on the Windows!

Sorry, sir, I do not know how to sign. How about using my digital signature instead?

Listen, the summers are becoming unbearable. Can you move the Earth a little away from the Sun?

This is how all of our land records are going to be stored—using blockchain technology. Look at those blocks and chains!

Of course, we are using nuclear energy for peaceful purposes. All our crops are actually being grown using the nuclear energy from the Sun!
