

lish a commercial plant for recycling lithium-ion batteries and e-waste using indigenous technology. The project will receive financial assistance of ₹75 million from TDB, with a total project cost of ₹150 million. The recycling facility aims to address the current low recycling rate of lithium-ion batteries, which stands at only 5%, with the rest ending up in landfills.

CleanMax alliance with Apple to boost renewable energy in India

CleanMax has partnered with Apple to establish 14.4MW of rooftop solar installations across six industrial sites in India. These installations are expected to reduce approximately 207,000 tons of carbon-dioxide emissions over their operational lifespan. The partnership focuses on providing renewable energy financing to help industries transition towards green energy sources and reduce energy costs.

Tata Power, Indian Bank partner for residential solar rooftop solutions

Tata Power Solar Systems Limited (TPSSL) has partnered with Indian Bank to promote the adoption of solar rooftop solutions in residential sectors and help the government's initiative of encouraging solar installations. Financing options will be available for residential solar installations, with loans up to ₹200,000 for systems up to 3kW under the Muft Bijli Yojana. For larger installations ranging from 3kW to 10kW, TPSSL and Indian Bank will offer customised financing plans, with loans up to ₹600,000, margin money

requirement of 20%, and interest rates between 8.4% and 10.8% per annum.

IIT Madras raises ₹3.68 billion funding from alumni

IIT Madras raised a record ₹5.13 billion during the financial year 2023-24, with ₹3.68 billion coming from alumni contributions. The latest figures represent a 135% increase from the previous year's ₹2.18 billion. The corporate social responsibility (CSR) segment gave ₹955.3 million. Forty-eight donors contributed ₹10 million or more, with 16 being alumni and 32 corporate partners. New funding pledges totalling ₹7.17 billion have been received for the next fiscal year, with ₹4.55 billion pledged by alumni and ₹2.62 billion

by corporate partners. The funds raised will be used to develop new technologies, support research, expand facilities, and provide scholarships for students. IIT Madras' fundraising is managed by its Office of Institutional Advancement, guided by the IIT Madras Alumni Charitable Trust.

Cadence partners with University of Bhutan for building VLSI design abilities

Cadence has signed a memorandum

SNIPPETS

- Honda launches e-mobility R&D centre in Bengaluru
- Crompton Greaves expands kitchen appliance manufacturing in Vadodara to meet rising demand
- BEL teams up with IIT Mandi for cutting-edge tech development
- SOA and Kaynes Semicon collaborate to address skill demand
- MHI reviews technical bids for 10GWh advanced cell manufacturing
- Sona Comstar gets second PLI certification for E2W hub wheel motor
- Sterling Tools signs MoU for greenfield manufacturing unit with Yongin Electronics
- REC plans to finance 50,000 e-buses in 2-3 years

of understanding (MoU) with the College of Science and Technology (CST) at the Royal University of Bhutan. The partnership aims to enhance VLSI design capabilities within the college by providing access to Cadence's latest EDA tools. Cadence's collaboration includes providing research bundle and AWR design environment bundle licences to the university.

Elfonze Technologies merges with iAMPS & Hz

Elfonze Technologies has announced a strategic merger with iAMPS & Hz's business unit focused on AI-EMC design synthetics platform Syn-thEMC AI. iAMPS & Hz specialises in electromagnetic compatibility services, offering solutions in design, simulation, verification, validation, certification, and calibration. Enhancement of technological capabilities and expanded reach across sectors like telecommunications,

medical technologies, aerospace, defence, renewable energy, and automotive industries.
