

Beginning of New Semicon India

of a teacher in her alma mater, Chitra contributed to her family income for two years, till she landed a role in the quality assurance department in the Indian Telephone Industries in Bengaluru.

"A job at ITI was a matter of great prestige but I wasn't building anything! I wondered what I would even do in quality assurance, but now that I look back at it, this was where I developed an eye for detail—an essential skill in chip design," says Chitra.

Every morning, the shop floors of the ITI, Bengaluru office saw a lanky 24-year-old girl chatting with an old technician reading a Kannada newspaper. "They had been working for many years on the shop floor. They would not answer the queries of a young girl, who spoke an entirely different language. I had to be one amongst them and the best way in was through the language. I used to stand beside the people reading the newspaper and ask them about the news. Slowly, I picked up words
