

FTD INFOCOM PVT LTD

TRAINING SERVICES

As an esteemed ARM Authorized training partner, FTD Infocom stands at the forefront of delivering unparalleled training on ARM Processors. Our comprehensive programs provides intricacies of processors and connectivity, providing hands-on experience with development boards.
Our Primary offering is in the following space: <https://www.ftdinfocom.com/training>
ARM v8.1-v9 Architecture • CORESIGHT SOC-600 • AMBA AXI4 AND AXIS:400/600 • DDR5, LPDDR5 • USB 4.0, Type-C Protocols • PCIe Gen 4-5 • RISC - V • Wi-Fi 7

EMBEDDED

RELYENCE		Reliance® offers a complete solution for all your reliability and quality software needs. FMEA • FRACAS • Fault Tree • Reliability Prediction • RBD • Maintainability Prediction • Weibull • ALT
SEGGER		Embedded Studio is the all-in-one Integrated Development Environment (IDE) • RTOS & middleware • Flasher in-circuit programmers • Debuggers • Trace debugger
ABSINT		AbsInt provides advanced development tools for embedded sys-tems, and tools for validation, veri-fication and certification of safety-critical software. Absint tools are based on a generic and generative framework which allows an extremely quick, sound and flexible response to customer needs.
SYSGO		Embedded Technologies RTOS for a Safe & Secure connected Future. Securing the Internet of Things with PikeOS®.PikeOS is a Hypervisor based separation microkernel. ElinOS is an industrial grade Linux designed to be built out of the box with ease.
PERCEPIO		Tracealyzer® lets embedded software developers dive deep into the real-time behavior. Speed up debugging, optimize performance and verify software timing. Users report 90% less debugging and doubled development speed.
CRANK		One tool for quickly designing and developing applications for multi-market embedded devices. Crank Storyboard enables R&D teams and UI Designers to quickly and collaboratively develop rich animated user interfaces for resource-constrained embedded devices.
ENGICAM		Engicam has a full range of system-on-module with all i.MX processors and Vybrid VF600. Engicam is providing their solutions for markets ranging from plc, train, electrical devices, vending machine, kiosk, point-of-interest.
CODESECURE		Implement Deep SAST with Codesonar • Fulfill Functional Safety & Coding Standards • Bring Security into DevSecOps • Binary Composition Analysis
IMAGIX		Imagix 4D helps developers comprehend complex, legacy or open source C, C++ and Java source code. Learn unfamiliar code.Eliminate bugs due to faulty understanding
AppVance		The AI-native, unified quality platform that delivers unprecedented levels of productivity to accelerate digital transformation. Achieve exhaustive application coverage with AI-generated autonomous testing. Launch resilient, comprehensive user-defined tests.
ITTIA		Manage embedded systems real-time data in a single database solution. Analyze, run data campaigns, and store time-series device data.
MONGOOSE		Mongoose Embedded Web Server for electronic devices Meet Mongoose - an open source embedded HTTP/Websocket/MQTT library for C/C++
Hex-rays		Hex-Rays is a commonly known for developing IDA Pro, a popular and widely used disassembler and debugger tool. IDA Pro (Interactive DisAssembler Professional) is a powerful reverse engineering tool that allows analysts to disassemble and analyze binary code of software applications. It is commonly used in the field of cybersecurity, malware analysis, and software security.
Intel		Accelerate digital transformation and unlock the power of AI and cloud computing without compromising on the security you need to stay compliant and in control.

LIFECYCLE MANAGEMENT

TEAMCENTER		Teamcenter® software is a modern, adaptable product lifecycle management (PLM) system that connects people and processes, across functional silos, with a digital thread for innovation.
POLARION		Everything you need to accelerate innovation in one Unified Solution.Connect teams and projects, and improve application development processes with a single, unified solution for requirements, coding, testing, and release

CAD/CAM

ZW3D		Integrated 3D CAD/CAM Solution Powered by Self-Developed 3D Geometric Modeling Kernel. Designed for the whole process of product development
NX		NX CAD for product engineering enables you to deliver products to the market right for the first time. Increase market gains, decrease development costs, and improve product quality through more virtual product models and fewer costly physical prototypes.

CIVIL

CYPE		CYPE develops and distributes BIM software for Architecture, Engineering and Construction professionals (AEC).
FINALCAD		Finalcad is a software that provides a platform for construction project management. It offers a solution called Finalcad One, which is a web-based and mobile app that allows users to automate and collaborate on the inspection, testing and maintenance of fire protection systems and other construction activities.
