

RAJGURU ELECTRONICS (I) PVT. LTD.

ADIY NEOWAY N58

N58 is an LTE Cat 1 module optimized specially for M2M and IoT applications. Adopting the 3GPP Rel.13 LTE technology, it delivers 10Mbps downlink and 5Mbps uplink data rates. This module has excellent RF performance, and it supports low power consumption and ultra-wide operating temperature range. N58 integrates various network protocols and provides industry-standard interfaces. With abundant functionalities and USB serial drivers for Windows 7/8/8.1/10, Linux, and Android, N58 is an optimal option for energy metering, telematics, industrial router, industrial PAD, video surveillance, environmental monitoring, etc.

SMART ENERGY

SMART
MANUFACTURING

WIRELESS MODULES

Discover seamless connectivity with our comprehensive range of network systems, featuring 2G/3G/4G/5G/NB-IoT/eMTC wireless modules. Tailored for Smart Energy, IoV, Smart Manufacturing, Commercial Retail, and Smart City applications, our automotive-grade, smart, and GNSS modules ensure reliable, high-performance solutions.

SMART CITY

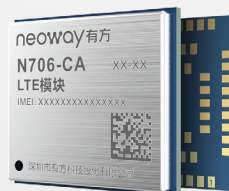

IoV (INTERNET OF
VEHICLES)

N11

- 5G NR Sub-6 GHz module
- Backward compatible with 4G and 3G network
- Supports USB drivers for Windows 7/8/8.1/10, Linux, and Android OS
- Consumer electronics, smart energy, industrial control, smart transportation industries

N706

- Industrial-grade cellular module
- Supports GNSS/ ARM Cortex-A5 processor
- Supported network mode: LTE Cat.1
- Interfaces supports : PCM, USIM, UART, I2C, USB2.0, SPI, and ADC
- Smart Metering, Smart gas, Mobile payment

M590

- Neoway GPRS Module
- compact wireless GPRS module
- Supports UART interfaces
- Supporting RING/LIGHT/DTR functions
