India and China Major Tablet Markets Amid Global Decline of 11%

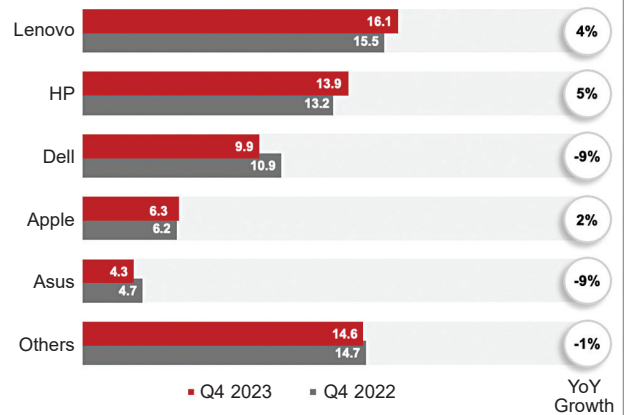

India and China emerged as major markets contributing to tablet adoption, mitigating the downturn experienced in other regions. Global tablet shipments saw a decline of 11% YoY in Q4 2023, with a total of 37.8 million units shipped. This resulted in an annual total of 135.3 million tablets for 2023, a 10% decrease compared to the previous year.

Global Q4 2023 PC Shipment Down by 0.2% YoY, 14% YoY Decline in Full Year

The global PC market experienced a 0.2% YoY shipment decline (eighth consecutive) in Q4 2023. Overall, 2023 saw 14% YoY shipment decline, attributed to slowdowns in both commercial and consumer sectors. Improvement is anticipated in H1 2024. AI-powered PCs will take centre stage in 2024, with an expectation of 50% market share in 2025.

Semiconductor Revenue Declines by 8.8%, Intel Back on Top

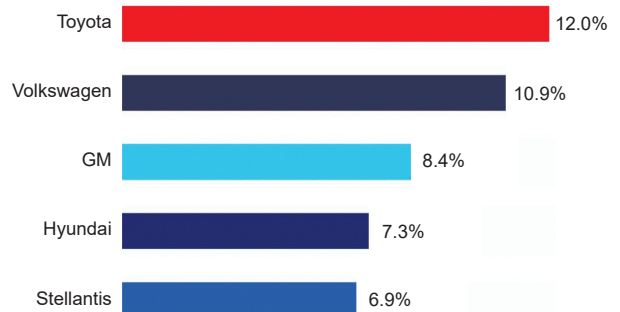

Year 2023 was a period of strategic adjustment for semiconductor companies preparing for the anticipated surge in AI demand. NVIDIA stood out with an 86% revenue growth in 2023—first time in the top five. The global semiconductor industry revenue declined by 8.8% in 2023, primarily due to reduced spending in enterprise and consumer sectors. Intel regained the top position from Samsung.

Semiconductor Companies	Revenue (\$ bn)		YoY (%)	Market Share		Ranking	
	2023	2022		2023	2022	2023	2022
Intel	50.5	59.8	-16%	9.7%	10.5%	1	2
Samsung Electronics	43.4	70.2	-38%	8.3%	12.3%	2	1
NVIDIA	30.3	16.3	86%	5.8%	2.8%	3	10
Qualcomm	30.2	36.3	-17%	5.8%	6.3%	4	3
Broadcom	30.0	26.6	13%	5.7%	4.7%	5	5
SK Hynix	23.6	35.0	-33%	4.5%	6.1%	6	4
AMD	22.6	23.6	-4%	4.3%	4.1%	7	7
TI	17.5	20.0	-12%	3.4%	3.5%	8	8

Embedded Connected Car Sales Jump 28% YoY in Q3 2023

Global connected cars sales increased by 28% YoY in Q3 2023. Two-thirds of the cars sold had embedded connectivity features. The surge in electric and autonomous vehicle adoption is driving this increase, with 4G technology dominating the market. 5G adoption is progressing slowly due to insufficient 5G infrastructure, the absence of unique 5G applications for vehicles, and supply chain constraints. By 2030, nearly all new passenger cars will feature embedded connectivity.
