

Electronics manufacturing gets ₹155 billion in Interim Budget

The government of India's Interim Budget for the fiscal year 2024-25 has allocated ₹155 billion to boost India's electronics manufacturing capabilities. Out of this, ₹69.03 billion has been allotted for the semiconductor mission. The fund allocation for the mobile production PLI scheme was increased to ₹61.25 billion in financial year 2025, from ₹44.89 billion in financial year 2024.

Tata Group, TI, and Tower Semiconductors offer to modernise SCL, Mohali

The Ministry of Electronics and Information Technology (MeitY) in the government of India aims to upgrade the Semi-Conductor Laboratory (SCL), Mohali, to industry-standard nodes of 65nm and 40nm

initially, with plans to advance to more cutting-edge nodes later. Since September 2023, MeitY has received nine bids from major companies, including the Tata Group, Tower Semiconductors, and Texas Instru-

ments. Around \$1 billion will be invested in the 48-year-old facility, which is the only chip manufacturing unit in India at present that produces semiconductors for strategic and defence purposes.

MoU between India and EU on developing semiconductor ecosystems gets government nod

The Cabinet of the government of India has approved India and the European Commission's agreement on collaboration for semiconductor ecosystems, its supply chain,

and innovation under the EU-India Trade and Technology Council (TTC) framework. Signed on November 21, the MoU will remain effective until its objectives are met, or participa-

tion is discontinued. The agreement supports both G2G and B2B cooperation to improve semiconductor supply chain resilience.

PEOPLE (on the move)

Nokia India appoints Tarun Chhabra as Head

Nokia has appointed Tarun Chhabra as the new head of Nokia India. Chhabra was previously in charge of mobile networks and a Senior Vice President at Nokia. He will start his new position in April 2024, taking over from Sanjay Malik. Chhabra will be responsible for the Indian market and managing the mobile networks group's business in India, under the supervision of Tommi Uitto, the President of Mobile Networks at Nokia.

Meta on-boards Broadcom CEO Hock Tan

Meta Platforms has added Hock E. Tan, CEO of Broadcom, to its board of directors. Broadcom, known for its networking chips, is a key partner for Meta in its data centre initiatives and efforts to design its own chips. Hock Tan has used Broadcom as a platform to build a conglomerate of technology companies, resembling a private equity portfolio focused on cash flow rather than a traditional operating company.
