

Calendar of Forthcoming Electronics Fairs/Exhibitions/Seminars/Events

Event, Date and Venue	Topics	Contact for details
EFY Expo Pune May 16-18, 2024 Auto Cluster Exhibition Centre, Pune	Electronics expo with conferences on automotive electronics, EVs, and Industry 4.0 (IIoT). Covers a wide range of electronics-related technologies, products, and topics, including electric drives, battery management systems, and IIoT solutions.	Website: https://www.efyexpo.com/PUNE/
Integrated Electronics Manufacturing And Interconnections 2024 (IEMI) July 29-30, 2024 Bengaluru	Themes: Advanced semiconductor packaging and aerospace and defence electronics. A networking platform for procurement and quality heads of OEMs, EMS, and semiconductor suppliers. Features top officials from government-owned defence, aerospace, and multinational corporations.	Website: https://www.ipc.org/ipc-india/iemi-2024-bangalore
EFY Expo Delhi-NCR August 2024 New Delhi	Major tech conference focusing on electronics, IoT, and AI. Simplifies new product development and manufacturing challenges in India. Offers assistance from leading suppliers, even for small batch productions.	Website: https://www.efyexpo.com/delhi-ncr/
19th Everything About Water Expo 2024 September 10-12, 2024 IICC, New Delhi	South Asia's largest water and wastewater event showcasing the latest technologies and solutions in water and waste management, endorsed by the Ministry of Jalshakti in India.	Website: https://www.eawaterexpo.com
Open Source India 2024 October 23-24, 2024 Bengaluru	Open Source For You magazine, in partnership with India's open source community and industry, brings various stakeholders under one roof to accelerate development and deployment of open source in India, and beyond. Government updates policies to align with its strategy for new age technologies

The Ministry of Electronics and Information Technology (MeitY) of the government of India is set to update policies to align with its 10-year strategy focusing on cryptography, quantum technologies, cyber forensics R&D, and mobile and IoT device security. Key initiatives include establishing a regulatory sandbox for IoT device security, developing indigenous tools for mobile application security, and promoting proactive detection strategies using AI and machine learning.

Applied Materials to invest in development of chip manufacturing equipment

Applied Materials has decided to collaborate with semiconductor supplier organisations in India to accelerate the commercialisation process. The company has announced a \$400 million investment over four years to establish an engineering centre in Bengaluru, focusing on developing technologies essential for semiconductor manufacturing equipment. This is expected to create 500 new advanced engineering jobs and 2500 jobs within the manufacturing ecosystem over five

years. Applied Materials is engaging with IISc in photonics and quantum materials to bridge the gap between students and tech professionals.

India reduces import duties on mobile components

The Indian government reduced import duties on components used in mobile phone manufacturing to 10% from 15%, ahead of the Interim Budget. This covers a range of components, including battery enclosures, primary lenses, rear covers, various mechanical parts made from plastic and metal combinations, and SIM sockets. The move is expected to boost both manufacturing and export activities within the sector.

Foxconn buys land in Bengaluru to build another factory

Foxconn is rapidly expanding its operations in India amid geopolitical issues affecting its operations in China. The company's Indian subsidiary plans to invest ₹12 billion in constructing a factory on its owned land. Foxconn bought 300 acres of land in Devanahalli, Bengaluru in May 2023. This investment aims to cater to its operational needs, particularly as an Apple supplier.

Qualcomm to expand operations in Chennai with a new design centre

Qualcomm plans to expand operations in Chennai with an investment of ₹1.77 billion in a new design centre. It is expected to generate employment opportunities for up to 1600 skilled professionals. The new centre will focus on wireless connectivity solutions, particularly innovations in Wi-Fi technologies. It will contribute to Qualcomm's global research and development activities in 5G cellular technology.

Uttar Pradesh government plans to cash in on semiconductor PLI scheme

The UP government plans to leverage the Centre's \$10 billion semiconductor PLI scheme. The state has introduced Semiconductor Policy 2024 to attract investments in chip manufacturing. The new policy offers incentives such as a 100% stamp duty waiver on land registration, 75% land subsidy on 200 acres, and a 30% subsidy on additional land. Companies investing around two million rupees will be eligible for a 5% annual interest subsidy and up to 100 million rupees for R&D.

Domestic drone makers want increase in the Budget for drones PLI scheme

The drone industry, represented by the Steering Committee for Advancing Local value-add and Exports (SCALE), is advocating for an expansion and increase in the Budget for the production-linked incentive (PLI) scheme for drones. The industry's primary request is to broaden the scheme to allow more participants and to increase the financial outlay, as the sector predominantly benefits startups and MSMEs.

Atal Incubation Centre signs pact with ITI for drone technology collaboration

Atal Incubation Centre (AIC) and the Industrial Training Institute (ITI) for Men in Mettupalayam have signed an agreement to collaborate on drone
