FiberMASTER MM/SM Fiber Optic Test Kit

Measure fibre optic power in milliwatts (mW) and decibel-milliwatts (dBm) to test and troubleshoot active LANs.

Quickly measure cabling loss with the automatic calibration feature that stores reference power from any light source for quick dB loss calculations.

Plus, the 1490nm wavelength measurement mode is perfect for troubleshooting emerging Fibre To The Home cabling systems.

Key Features

- 850, 1300, 1310, 1490 and 1550 measurement capability on power meter
- 850, 1300, 1310, 1550nm laser light source (33-931 kit)
- Power measurement in dBm and μ W, loss display in dB
- Includes universal adaptor for power meter and ST, SC and FC adaptors for light source
- Unique docking light source button operation make this the perfect fibre tester for use in the field
