India's PC, Tablet Market Set for 14% Growth in 2024

India's PC and tablet market is expected to experience a significant growth of 14% in 2024, with tablets anticipated to be the main driver of this growth. Q4 2023 recorded a 4% year-on-year growth with 4.3 million units shipped, driven by a 27% increase in desktop shipments, while notebook shipments grew by 3% and tablet shipments declined by 9%. Despite the quarterly growth, overall PC shipments fell by 11% in 2023. Easing import restrictions, positive consumer sentiment, delayed IT procurement now taking place, and the government's 'Make in India' initiative, provide a robust outlook for 2024.

Global Smartphone Shipments Grow 11% YoY in 1Q 2024

Worldwide smartphone shipments grew 11% year-on-year (YoY) in the first quarter of 2024 as consumer demand momentum picked up along with the global macroeconomic recovery. Samsung regained the top spot with a 20% share, while Apple came second with a 16% market share. In January 2024, smartphone shipments in the top five markets in Southeast Asia surged to 7.26 million units, marking a significant 20% YoY increase.

India EV Sales Nearly Double in 2023, and Likely to Rise 66% in 2024

India's electric vehicle (EV) sales nearly doubled to account for 2% of the overall PV sale; the latter growing by 10% YoY. Projections for 2024 show EV sales rising 66% to constitute 4% of total passenger vehicle (PV) sales, driven by new entrants and government subsidies. Tata Motors held more than two-thirds of the country's EV market in 2023 but lost some share to Mahindra & Mahindra and BYD. Recording a 2476% increase with just one model in its portfolio, Mahindra & Mahindra was the fastest-growing brand in 2023, followed by BYD and MG Motor.

Global EV Battery Market Grows by 44%, China Leads The Way

Global battery installed capacity for passenger EVs grew by 44% YoY in 2023. A key driver was increased average battery capacity per vehicle coupled with continued growth of EV sales at 38% YoY in 2023. Chinese battery makers grew faster than most others with CATL and BYD the main beneficiaries of market share gains. In the short-term, OEMs are likely to continue the shift from performance-centered to price-centered EVs as the market slows, leveraging strategies to expand sales of cost-effective EVs with Chinese LFP batteries.

Key EV Battery Supplier Installed Capacity (GWh) Share
