

GO. A breath of fresh air in power electronics.

Cost-effective and accurate, miniature isolated current sensor GO speeds your drives applications.

A unique sensor with an integrated primary conductor achieves optimum temperature accuracy, measuring from -40 to +125 °C in a surface mounted SO8 or SO16 package.

- 4-30 A nominal current
- Better than 1.3 % accuracy @ +25°C
- Differential Hall principle measurement: Very robust against external fields
- 2 μ s response time
- Up to 3 kV RMS isolation
- Double Over-Current Detection outputs for short circuit and over-load protection (SO16 version)

At the heart of power electronics.
