Electronics becomes India's fifth largest export category

Boosted by Apple's iPhone exports, India's electronics exports grew by 24% in FY23, totalling over \$23.6 billion, becoming the fifth largest export category for the country, the Department of Commerce announced. iPhone exports alone constitute 35% of India's entire electronics export goods basket. Mobile phone exports reached \$15.5 billion, contributing 53% to total electronics exports.

Tamil Nadu exports highest number of electronics goods in 2023

Tamil Nadu has become India's largest exporter of electronics goods in FY23, accounting for 30% of all electronics goods exports from India in FY24. The state exported electronics goods worth over \$7.4 billion between April 2023 and January 2024, almost

quadrupling from FY22. Smartphones constitute nearly 40% of India's electronics exports, with a substantial portion originating from Kancheepuram district in Tamil Nadu, particularly to key markets like the United States and the UAE.

India, US, South Korea to collaborate in technology sector

India, the US, and South Korea discussed cooperation in the technology sector at a first of its kind trilateral dialogue, held in Seoul, to enhance cooperation in semiconductor supply chains, digital public infrastructure, artificial intelligence, quan-

tum computing, critical minerals, and military hardware production. The three sides committed to support shared economic and national security interests, spur innovation, and provide technology solutions for the Indo-Pacific region.

Microsoft announces Pavan Davuluri as Head of Windows And Surface

Microsoft has appointed Pavan Davuluri as the Head of its Windows operating system and Surface devices teams. The company combined the two divisions which were split following Panos Panay's departure to Amazon. Davuluri, a 23-year Microsoft veteran who contributed to collaborations with Qualcomm and AMD for custom Surface processors, will now lead the unified Windows and Surface teams. Mikhail Parakhin, previously responsible for Windows, left the division to explore new roles.

Ericsson appoints Andres Vicente to head India Oceania and South East Asia Market

Swedish multinational networking and telecommunication company Ericsson has appointed Andres Vicente as the new Head of Market Area Southeast Asia, Oceania and India and Senior Vice President. Vicente, who was earlier serving as Head of Ericsson's customer unit Iberia within market area Europe & Latin America, will now succeed retired Nunzio Mirtillo. Vicente joined Ericsson in 2021 and has a 25-year tenure at Vodafone, where he held various commercial roles, including leading marketing, sales, and different market segments.
