

Calendar of Forthcoming Electronics Fairs/Exhibitions/Seminars/Events

Event, Date and Venue	Topics	Contact for details
EFY Expo Pune May 16-18, 2024 Auto Cluster Exhibition Centre, Pune	Electronics expo with conferences on automotive electronics, EVs, and Industry 4.0 (IIoT). Covers a wide range of electronics-related technologies, products, and topics, including electric drives, battery management systems, and IIoT solutions.	Website: https://www.efyexpo.com/PUNE/
Integrated Electronics Manufacturing And Interconnections 2024 (IEMI) July 29-30, 2024 Bengaluru	Themes: Advanced semiconductor packaging and aerospace and defence electronics. A networking platform for procurement and quality heads of OEMs, EMS, and semiconductor suppliers. Features top officials from government-owned defence, aerospace, and multinational corporations.	Website: https://www.ipc.org/ipc-india/iemi-2024-bangalore
EFY Expo Delhi-NCR August 2024 New Delhi	Major tech conference focusing on electronics, IoT, and AI. Simplifies new product development and manufacturing challenges in India. Offers assistance from leading suppliers, even for small batch productions.	Website: https://www.efyexpo.com/delhi-ncr/
19th Everything About Water Expo 2024 September 10-12, 2024 IICC, New Delhi	South Asia's largest water and wastewater event showcasing the latest technologies and solutions in water and waste management, endorsed by the Ministry of Jalshakti in India.	Website: https://www.eawaterexpo.com
Open Source India 2024 October 23-24, 2024 Bengaluru	Open Source For You magazine, in partnership with India's open source community and industry, brings various stakeholders under one roof to accelerate development and deployment of open source in India, and beyond.	Website: https://www.opensourceindia.in
India Electronics Week February 26-28, 2025 KTPO Expo Center, Whitefield, Bengaluru	India's No. 1 event for creators of smart electronics solutions to discover latest techniques, best practices and technologies for developing electronics better, cheaper and faster, and meet service providers, suppliers and partners who can enable growth of your business.	Website: www.indiaelectronicsweek.com

RRP Electronics to invest ₹50 billion in OSAT and R&D in Maharashtra

RRP Electronics has announced an investment of ₹50 billion over the next five years to establish a semiconductor facility in Maharashtra while unveiling its over 2300 square metre facility in Navi Mumbai. The company plans to expand its operations by adding a research and development centre and a multi-line outsourced semiconductor assembly and test (OSAT) and fab foundry. Sachin Tendulkar is a strategic investor in the plant.

HPE partners with VVDN for servers manufactured in India

Hewlett Packard Enterprise (HPE) has initiated the rollout of servers manufactured in India, in collaboration with VVDN Technologies, less than a year after announcing plans for local manufacturing. The company aims to manufacture approximately \$1 billion worth of high-volume servers within the first five years of production. The company is actively exploring opportunities to deepen localisation

by leveraging VVDN's backward integration capability.

Government of India to review laptop import management system

The Indian government plans to review the import management system for laptops and other digital devices in September to evaluate electronics manufacturers' readiness to establish or expand their manufacturing presence in India. The review will assess importers based on the number of laptops imported since October 2023, the origin of these devices and components, and whether the components came from trusted sources. The import management system, implemented in October of the previous year, requires importers to obtain a licence for certain IT hardware categories.

Government extends smart meter policy to install 250 million smart metres

The Indian government has extended the Smart Meter National Program (SMNP) to replace 250 million conventional electricity metres with

prepaid smart meters over the next five years. The program features modularity in capital expenditure and an escrow structure to regulate payments, which lowers risks and encourages private sector participation. The project includes grants of up to ₹1350 per smart meter from the Centre. This project, with an estimated capital expenditure of ₹1500 billion, offers a significant business opportunity for IoT module makers, as smart meters consist of eight modules that enable their functionality.

Indosol launches whole solar module manufacturing plant in Andhra Pradesh

Indosol Solar Private Limited inaugurated an advanced solar PV module production unit in Andhra Pradesh on March 31, 2024. The facility is poised to produce 500MW of solar modules using efficient technologies such as TOPCon and HJT. The company is aiming to make it a fully integrated quartz-to-module manufacturing site for TOPCon and HJT cells in phases. Phase 1A, expected to be completed by December 2024, will create 800 jobs.

Foxconn's Bharat FIH to make more than just phones

Foxconn's subsidiary, Bharat FIH, is diversifying its manufacturing operations beyond Android phones to sectors such as telecom equipment, electric vehicles, televisions, and displays. The shift aims to reduce the company's reliance on Xiaomi, its main client, whose orders decreased by 70% from 2021 to 2023. Bharat FIH is exploring opportunities in segments supported by the Production Linked Incentive (PLI) scheme. The company claims to have an 'exceptional capability' to expand its operations as needed.

Qualcomm opens wireless tech design centre in Chennai

Qualcomm has launched a new end-to-end design centre in Chennai that will focus on wireless technologies to complement Wi-Fi and host a team of 1600 semiconductor designers. The company aims to help the Indian government to set up an industry growth roadmap for automobiles and telecom electron-
