Why Choose Us?

Design & Development:

Creating entire systems, including software, instrumentation & enclosures.

Expert Team:

Experienced engineers dedicated to developing FCT/EOL Test Jigs, offering technical support, pin fixture development, fabrication & debugging.

Customized Offerings:

Our Functional & EOL testers provide a standard, modular structure configured for any test requirement, ensuring consistent, reliable & traceable results.

Benefits of Kyoritsu's EOL Tester

- * Development for measurement, control and computation.
- * Signal conditioning circuit board design.
- * Precision control
- * Signal acquisition e.g., voltage, current, load, temperature, distance.
- * Test executives
- * Personnel safety
- * Common mode & high-voltage isolation custom signal conditioning circuit board design.
- * Automated test report generation.
- * Real-time control
- * Power measurements
- * Lab view platform to develop the application for EOL testers.
