

India partners with US for its first defence chip fab

India will establish its first national security semiconductor fabrication plant in collaboration with the US following PM Modi's meeting with President Biden. Named 'Shakti,' the plant will focus on producing GaN and SiC chips for military and telecommunications uses. This venture, supported by Bharat Semi and the US Space Force, will be located near Jewar Airport in Uttar Pradesh.

NTPC Green Energy is planning ₹100 billion IPO

NTPC Green Energy is preparing for a ₹100 billion initial public offering (IPO) to boost its renewable energy investments. The IPO, expected to launch in early November 2024, follows the filing of its draft red her-

ring prospectus with SEBI. Funds raised will reduce loans for NTPC Renewable Energy Limited and support expansion. The company aims for 60GW capacity by 2032.

PEOPLE (on the move)

Tata Electronics appoints Bobby Mitra as CIO

Tata Electronics has appointed Bobby Mitra as Chief Information Officer (CIO) and President of AI and Digital Transformation, for overseeing initiatives in semiconductor manufacturing and digital shifts. His leadership will focus on establishing India's first semiconductor fab in Dholera and an assembly facility in Jagiroad. Mitra brings extensive experience from Texas Instruments and Deloitte

Consulting to enhance smart manufacturing.
