

instruments, has launched the Metavision-8i, a new optical emission spectrometer (OES) aimed at the metal industry.

The Metavision-8i addresses the need for affordable yet

advanced elemental analysis, especially benefiting MSMEs by offering high-end features at a competitive price. Traditionally, smaller manufacturers faced barriers due to the high cost of OES systems, limiting market access. The Metavision-8i provides precision, low-ppm analysis with features like dual optics, high-resolution DUV optics, and CMOS detectors.

AUTOMATION

Industrial IoT gateway

IBASE Technology Inc. introduces the AGS104T, an industrial IoT gateway powered by Intel Atom x7433RE

and x7211RE processors for high performance in demand-

ing environments. Featuring up to 16GB DDR5-4800 memory, dual 2.5G Ethernet ports, and versatile COM ports, it supports industrial flexibility with M.2 and Mini PCI-E expansion slots. With TPM 2.0 security, GPIO 4-in/4-out, and mounting options for DIN-rail or wall, the AGS104T is a reliable, adaptable solution for critical IoT applications.

Factory automation solutions

Panasonic Life Solutions India (PLSIND), through its industrial devices division (INDD), has launched a range of factory automation solutions to boost industrial efficiency. Key products include the GM1 motion controller, combining PLC logic and

motion control; the AI-powered MINAS A7 servo system, including MINAS CZ1 and A6SC, tailored for India; and the HL-G2 Series, a high-accuracy laser displacement sensor.

HL-G2 SERIES - Laser Sensor

GM1 Motion Controller

MINAS A7 Servo Systems

These solutions enhance productivity, reduce errors, and improve safety. Ideal for industries like semiconductors, electronics, and packaging, they support real-time monitoring, precise measurement, and Industry 4.0 integration, driving digital transformation and aligning with the Make in India initiative.

Machine vision, mobile robots

Hikrobot recently introduced its latest innovations in machine vision and mobile robots, including the Forklift

Latent Mobile Robot QF-1000 and the Tugging AMR, in India. The QF-1000 features a versatile chassis,

integrated forks for pallet handling, and enhanced mobility in narrow spaces, with a 25% speed increase. It also offers 360° safety protection, Wi-Fi connectivity, and seamless operation. The Tugging AMR can tow up to 2000kg, with 5mm precision and automatic hooking/unhooking. Hikrobot's exhibit also showcased AI-powered smart cameras, visual inspection controllers, DWS systems, and other industrial automation solutions.

MISCELLANEOUS

Small TFT displays adaptor

The Raspberry Pi Zero becomes more versatile with a small TFT display,

thanks to DISPLAY VISIONS' adaptor for the Raspberry Pi Zero's GPIO connector. This adaptor supports touch

functionality for the TFT015, TFT020, TFT028, and TFT035 displays, with

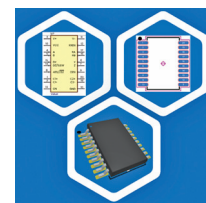

downloadable Raspberry code for various applications. The compact 51.6mm x 17mm adaptor connects to the display via a flexible FPC cable and supports low-power operations. The 2.4mm (1.5-inch) IPS TFT displays offer excellent colour stability from different angles, brightness over 1000cd/m², and multiple interface modes like RGB and SPI. Ideal for industrial and medical use, they also operate under direct sunlight.

PCB component library

PCBPartz.com is a collaboration between Zettaone Technologies Inc.

and PCB Libraries Inc., providing a comprehensive PCB component library and outsourcing services. Designed for

PCB designers, manufacturers, and engineers, the platform streamlines workflows, improves accuracy, and ensures consistency in PCB production by offering industry-standard symbols and footprints, including IPC-7351 compliant parts. By outsourcing library tasks, companies can avoid project delays. PCBPartz enhances efficiency through its high-quality, customisable library data, helping to minimise design errors. Users can try a 30-day free evaluation with 10 download and part credits or subscribe to the Platinum plan for \$300/year, with 300 downloads monthly.
