## AI Demand Causes Global Foundry Market to Surge

In Q2 2024, the global foundry industry saw a 9% QoQ and 23% YoY revenue increase, driven by AI demand. TSMC led with a 62% share and revenue growth. Samsung's revenue rose due to smartphone restocking, maintaining a 13% market share. SMIC and UMC showed strong results, with SMIC benefiting from China's recovery. GlobalFoundries also reported solid results, with a 5% market share, driven by automotive growth and stabilising demand.

## Concurrently Global IC Sales Surge 27% YoY in Q2

In Q2 2024, integrated circuit (IC) sales surged 27% YoY globally, with a 29% projected increase in Q3 due to AI demand. Wafer fab capacity hit 40.5 million, expected to grow 1.6% in Q3. Foundry and logic capacities rose 2% in Q2, projected to increase 1.9% in Q3. Memory capacity grew 0.7%, expected to rise 1.1%. Chip capital expenditures fell 9.8% YoY but are expected to rise in Q3.

## Global Chip Sales Record 18.7% YoY Growth in July 2024

In July 2024, global semiconductor sales rose to \$51.3 billion, an 18.7% increase from \$43.2 billion YoY and a 2.7% rise MoM. The Americas (North and South) led with a 40.1% YoY increase to \$15.41 billion, followed by China's 19.5% YoY increase to \$15.23 billion. However, Japan and Europe experienced YoY declines of 0.8% and 12%, respectively.
