

Government greenlights Kaynes' Gujarat OSAT facility

The Union government has approved Kaynes Semicon's plan to build a ₹33.07 billion outsourced-semiconductor assembly and test (OSAT) facility in Sanand, Gujarat. The plant will produce 6.3 million chips daily, with investments split between the central and Gujarat governments and self-financed by Kaynes. This facility supports India's semiconductor ecosystem and aims to enhance competitiveness in global markets.

Central government to inject ₹60 billion into BSNL 4G

The Indian government is planning to allocate over ₹60 billion to BSNL to address delays in its 4G rollout, the lack of which has been worsening its subscriber losses. This funding will support the installation of network gear for 100,000 sites, with the new completion target set for mid-2025, pushing back the original Diwali 2024 deadline.

Maharashtra approves Adani-Tower two-phase chip fab venture

Maharashtra's cabinet sub-committee has approved the ₹839.47 billion semiconductor fabrication plant by Israel's Tower Semiconductor and Adani Group in Pandal. The project, split into two phases, will create 15,000 jobs, and will start with a monthly capacity of 40,000 wafers, expanding to 80,000. This venture follows the cancellation of the Vedanta-Foxconn plant.

US eyes to partner with India to diversify global chip ecosystem

The US Department of State has disclosed plans to collaborate with India under the International Technology Security and Innovation (ITSI) Fund, part of the CHIPS Act of 2022, to strengthen the global semiconductor supply chain. This partnership aims to reduce dependence on China and enhance the semiconductor ecosystem in both nations through joint initiatives and assessments.

Calendar of Forthcoming Electronics Fairs/Exhibitions/Seminars/Events

Event, Date and Venue	Topics	Contact for details
Open Source India 2024 October 23-24, 2024 NIMHANS Convention Center, Bengaluru	Open Source For You magazine, in partnership with India's open source community and industry, brings various stakeholders under one roof to accelerate development and deployment of open source in India, and beyond.	Website: https://www.opensourceindia.in
C-Touch Display Shenzhen 2024 November 6-8, 2024 Shenzhen World Exhibition & Convention Center	The International Touch & Display Exhibition integrates global industrial resources, helps enterprises in the new display and smart touch industry chain, continuously enhances brand influence, expands global business opportunities, and leads the new trend of the development of the global new display, smart touch and terminal application industry.	Website: https://www.quanchu.com.cn
NEPCON Asia 2024 November 6-8, 2024 Shenzhen World Exhibition & Convention Center (Bao'an)	NEPCON Asia is an important sales channel and partner for electronic manufacturing solution providers to develop new business, develop new customers and obtain new orders.	Website: https://www.nepconasia.com
EFY Expo Chennai December 12-14, 2024 Chennai Trade Centre, Chennai	Major tech conference focusing on electronics, IoT, and AI. Simplifies new product development and manufacturing challenges in India. Offers assistance from leading suppliers, even for small batch productions.	Website: https://chennai.efyexpo.com
India Electronics Week February 26-28, 2025 KTPO Expo Center, Whitefield, Bengaluru	India's No. 1 event for creators of smart electronics solutions to discover latest techniques, best practices and technologies for developing electronics better, cheaper and faster, and meet service providers, suppliers and partners who can enable growth of your business.	Website: www.indiaelectronicsweek.com
EFY Expo Pune May 15-17, 2025 Auto Cluster Exhibition Centre, Pimpri, Pune	Electronics expo with conferences on automotive electronics, EVs, and Industry 4.0 (IIoT). Covers a wide range of electronics-related technologies, products, and topics, including electric drives, battery management systems, and IIoT solutions.	Website: https://www.efyexpo.com/PUNE/?

tem in both nations through joint initiatives and assessments.

NXP Semiconductors to invest ₹84 billion in Indian R&D

NXP Semiconductors plans to invest over \$1 billion (₹84 billion) in expanding its R&D operations in India, aiming for more than double this amount in the future. Announced at SEMICON India, this investment supports India's growing semiconductor sector, which benefits from a \$10 billion government incentive and is projected to reach \$63 billion by 2026.

LG hints IPO for Indian unit eyeing \$75 billion goal

LG Electronics is considering an IPO for its Indian operations to boost its global revenue to \$75 billion by 2030. CEO William Cho highlighted the Indian market's potential, noting increased investor interest. Although no final decision or valuation has been set, LG Electronics is tapping major banks, as the IPO aligns with LG's strategy to grow its consumer electronics division.

Dixon, HKC's ₹2.5 billion partnership targets display modules

Dixon Technologies plans to form a joint venture with China's HKC, acquiring a 74% stake and investing ₹2.5 billion to produce display modules for tablets, laptops, and smartphones. The venture, pending government approval, will establish a new manufacturing plant in 8-10 months, expanding Dixon's electronics manufacturing capabilities.

Igus plans polymer plant in Bengaluru for chip and renewable energy sectors

Polymer manufacturer Igus plans to invest ₹1 billion in a new 8559 sq. m facility in Mandur, Bengaluru, focusing on semiconductors and renewable energy equipment. Allotting ₹200 million for setup, ₹400 million for advanced machinery, and ₹200 million for manufacturing processes in the Bengaluru unit, Igus is also investing in logistics and assembly centres and clean room facilities in Pune, Gurugram, and Noida.
