Global Battery Management System Market to Reach \$39B by 2032

The global battery management system (BMS) market, valued at \$7.94 billion in 2023, is projected to reach \$39.18 billion by 2032, growing at a CAGR of 19.4%. Key drivers behind the growth include rising EV adoption, renewable energy integration, and stringent regulations. North America leads with over 32% market share, and major players in the sector include Texas Instruments, NXP Semiconductors, and Analog Devices.

Global Semiconductor Sales Up 18.3% in 2Q24

The second quarter of 2024 saw global semiconductor sales jump 18.3% YoY to \$149.9 billion, driven by robust demand, and a 71% rise was recorded in silicon wafer shipments than Q1. Growth was notable in China and Asia Pacific, while Japan and Europe faced declines due to decreasing regional demand and global economic weakness. Nevertheless, June sales reached \$50 billion, reflecting solid regional performance. The forecast predicts increased demand due to expanding semiconductor fabs and AI applications.

India's Enterprise IoT Spending to Increase 14% in 2024

India's enterprise IoT spending is set to rise 14% this year, contributing to a projected \$690 billion global market by 2030 with a CAGR of 15%. Despite a 15% YoY growth last year, the worldwide market rise will slow to 12% in 2024, reaching \$301 billion before accelerating again. India, along with the US and China, will lead in growth, driven by advancements in IoT software and regional investments.
