Budget 2024 sees more funds, revised taxes for electronics

In the Union Budget 2024-25, Finance Minister Nirmala Sitharaman revamped taxes on electronics and raw materials to support local manufacturing and reduce import dependence. Key measures include a funding increase for the Ministry of Electronics & Information Technology (MeitY), with significant boosts for semiconductors and artificial intelligence. Customs duties on electronics like smartphones were reduced, and angel tax was abolished to benefit startups. A one billion rupee MSME credit scheme and a new ten billion rupee startup fund were also announced.

MeitY's allocation soars 52% to ₹219.36 billion in the Budget

In the Union Budget 2024-25, funding for the Ministry of Electronics & Information Technology (MeitY) increased by 52% to ₹219.36 billion, driven by a 355% rise in capital for the schemes to advance India's semiconduc-

tor industry. Significant funds include ₹42.03 billion for semiconductor facilities and ₹5.52 billion for artificial intelligence infrastructure. This boost aims to enhance global competitiveness and reduce import dependence.

PEOPLE (on the move)

Alphawave Semi appoints Sameer Ladiwala as CAO

Alphawave Semi has appointed Sameer Ladiwala as Senior Vice President of Finance and Chief Accounting Officer (CAO). The appointment aims to enhance Alphawave Semi's finance organisation and support its growth plans. With over 25 years in chip financial management, Ladiwala has previously served at Luminar Technologies, ARM, and Cypress Semiconductor.

His experience includes overseeing significant merger and acquisition deals and complex accounting transactions.

ChipEdge appoints Damodaran Subramanian as new CEO

ChipEdge has appointed Damodaran Subramanian as the Chief Executive Officer (CEO) to drive its expansion efforts. This move aligns with ChipEdge's growth phase, ChipEdge 2.0, focusing on talent development and technological innovation. With over 30 years in the automotive and aerospace sectors, Subramanian will enhance the company's leadership and engineering capabilities. He will also continue his role at Celton Semiconductors, advancing VLSI and embedded electronics development.

SMILE Electronics appoints Kannan Krishnan as COO

SMILE Electronics has appointed Kannan Krishnan as its Chief Operating Officer (COO). Besides looking after business and operational efficiency, his role will include overseeing the launch of three new IT hardware facilities in India in a partnership with ZETWERK, aiming for high production capacity and expanded market presence. With 32 years in EMS, Krishnan has held key roles at MIRC Electronics, Nokia, and others.

ZETWERK appoints ex-Royal Enfield CEO Vinod Kumar Dasari to board

ZETWERK has appointed Vinod Kumar Dasari to its board, effective July 1, to guide its expansion into the electronics, aerospace, renewables, and industrial sectors. His expertise is expected to bolster Zetwerk's manufacturing capabilities. Dasari, with nearly 40 years of experience, previously served as CEO of

Royal Enfield and held roles at Ashok Leyland, Timken, and Cummins India.
