

cal movement is close to perfection, so the time it displays is always almost accurate. The watch passes through rigorous tests lasting almost 15 days. The tests check its performance under different positions, temperatures and water.

Visconti W105 2 squared chronograph watch

A chronograph watch has stopwatch capabilities to measure elapsed time (in seconds, minutes and hours) through different counters and mechanisms. This gives the user the ability to count every small event.

Pathos CH-7323S automatic dual-time chronograph watch

Leading manufacturers in this field are Fossil, Titan, Timex and Casio, among others.

Solar- or light-powered watch. These watches are powered by solar cells. These absorb sunlight or artificial light behind the crystal using a solar panel. A solar panel below or on the dial converts light into electrical

Casio solar-powered tide and moon graph watch

energy to power the watch.

These watches store energy in rechargeable cells to power themselves when covered under clothes or at night. Some watches store energy in lithium-ion batteries for several months. Others have a power-saving mode, which stops the seconds hand until the watch is re-exposed to light. Leading manufacturers for solar watches are Casio, Citizen and others. **EFY**
