

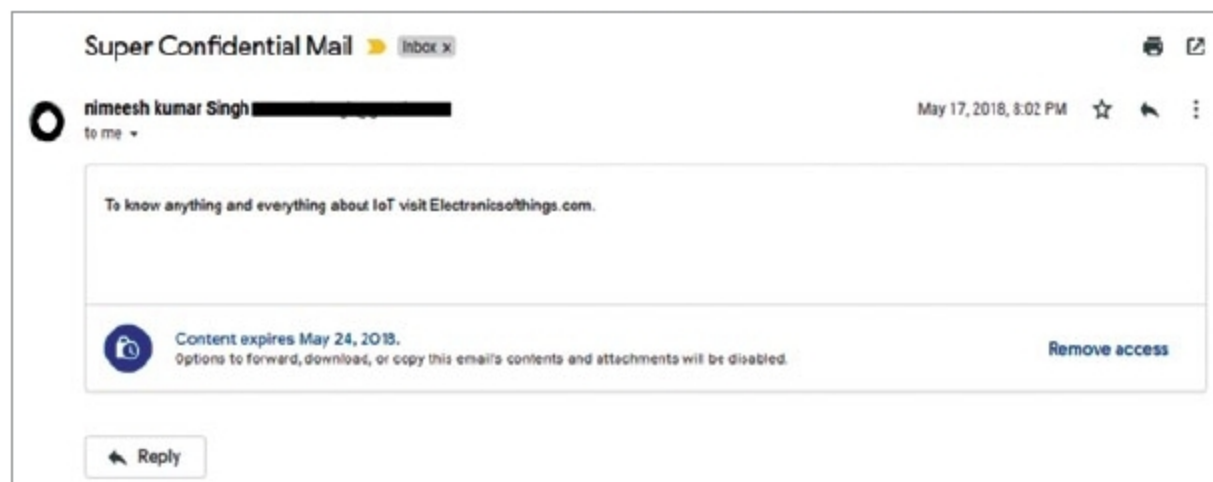

Fig. 4: Receiving email in Confidential mode

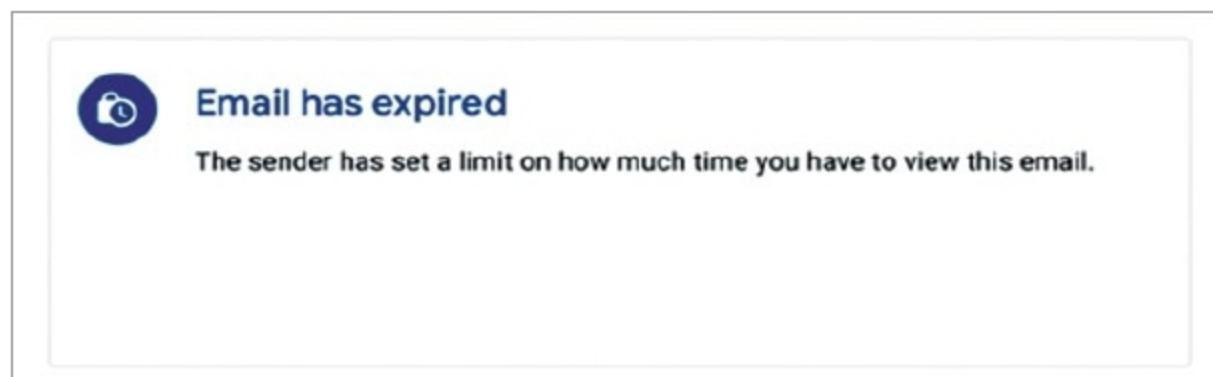

Fig. 5: Expiry notification of email received

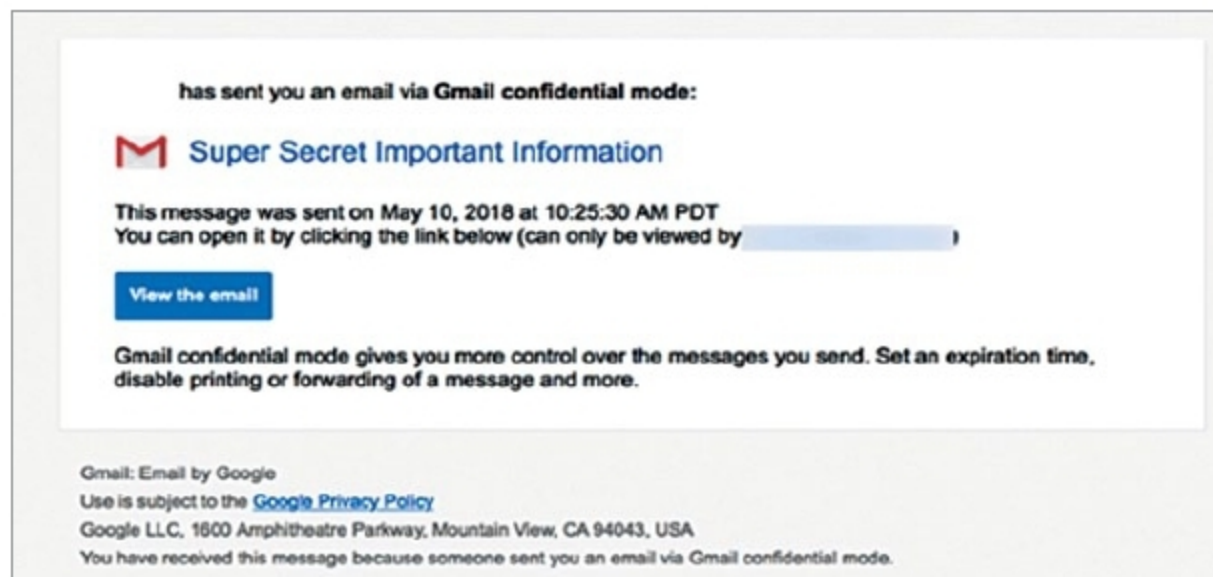

Fig. 6: Confidential mode for non-Gmail users

A badge (Fig. 3) informs you that the email is being sent in Confidential mode. You can also view/open your message in Sent folder, to disable access immediately if you do not want to wait till the message's expiry date.

Receiving confidential emails. When you receive an email in Confidential mode, it appears like the screenshot shown in Fig. 4. Forward button is disabled, and a banner at the bottom explains the feature. The email looks much like standard email. However, when it expires, the text dis-

appears entirely. Fig. 5 shows the box that is displayed on expiry.

The simple look and feel is not the same for other platform users. Non-Gmail users get the message shown in Fig. 6.

Confidential mode only inhibits the recipient from forwarding the email by clicking on Forward button. The message can be copied, or a screenshot taken, and forwarded. Essentially, it shows the intent of the sender that the email is of confidential nature and should not be shared with anyone. **EFY**
