

USEFUL **AUTOMOTIVE ELECTRONIC GADGETS** WITHIN ₹ 15,000

Paromik Chakraborty

Whenever we get in our cars for a long drive, we tune into our favourite music. We come across taxi cabs that have screens fixed on the back of the headrests of the front seats, for playing video or movies on the go. There are gizmos that tell us if we are spending more fuel than we should, or taking an unnecessarily longer route. Some keep us informed of an impending engine breakdown. Such electronic devices have become our daily riding companions. So, which devices could be most useful? What are the market options? In this article we look at some such devices, within a budget of ₹ 15,000.

Infotainment systems

Car infotainment systems are one of the most popular categories of automotive electronics. Modern infotainment setups include touchscreen displays, good quality speakers, and multiple connectivity options like USB ports, auxiliary cables, Bluetooth, GPS and Wi-Fi support.

While purchasing one, look

for sound output capacity of at least 50 watts per speaker and more number of connectivity features. Given below are some interesting infotainment systems available in the market today.

Sony XAV-V630BT. Sony offers a range of automotive infotainment systems with a gamut of cool features. XAV-V630BT is its sub-15,000 range offering. It has a 15.8cm (6.2-inch) touch-enabled LCD screen with 17:9 aspect ratio and 800x480-pixel resolution.

Connectivity modes include USB, auxiliary cable and Bluetooth support. There are four speaker units,

Sony XAV-V630BT

each with an output power of 55 watts. Bluetooth allows you to control the system through your smartphone using a mobile application. You can
