

Gaming laptop

Designed to satisfy budding gamers

Acer has unveiled Nitro 5 gaming laptop, which packs in six-core high-performance 8th-generation Intel Core processor with NVIDIA GTX 1050 or 1050Ti graphics card, or AMD Ryzen 5 processor with Radeon RX560 graphics for faster rendering, improved lighting and texture details. Intel Optane memory gives fast read and write speeds, quick loading and restarting in seconds. System memory is clocked at 2666MHz. Acer's Nitro Sense control software for cooling management and system monitoring allows monitoring of the CPU/GPU.

Nitro 5's 39.6cm (15.6-inch) full-HD IPS display produces brilliant visuals with crisp details. The front-facing HD Web camera lets players strategise face-to-face. The laptop features finely tuned, high-quality speakers with Dolby Audio Premium and Acer TrueHarmony technology. This equips gamers with the necessary gear to hone in on the faintest sounds of tip-toeing attackers and relish in the reverberating boom of a carefully placed landmine.

Nitro 5 features dual-stream 802. It is also enabled with an updated wireless technology that gives a speed of 1.73Gbps—four times faster than 1x1ac wireless—and a plethora of ports (including USB Type-C, HDMI 2.0 and gigabit Ethernet).

Power bank

Charge multiple devices at once

Adding to its power bank portfolio, QHMPL has launched a portable and durable QHM 10,000mAh power bank, equipped with three USB ports. LED indicator on the power bank helps keep the battery status in check. It is a BIS-certified product, and comes with several safety features like over-voltage, short-circuit, over-discharge and over-current protection. The high-powered lithium-ion battery ensures faster charging. With 10W maximum output (5V-2A) and conversion rate up to 80 per cent, it adjusts output as per the connected device. The device supports more than 500 charge/discharge cycles.

Projector

The truest 4K quality big screen experience

BenQ has unveiled its home entertainment TK800 DLP sports projector in a new avatar. Featuring true 4K, 3840 x 2160 UHD resolution with 8.3 million distinct pixels, TK800 produces stunningly life-like realism. It utilises projector-optimised HDR to enhance brightness and contrast range with one-step image optimisation and automatic HDR natural colour rendition. The projector comes with a lamp life of up to 15,000 hours—the first in a home entertainment projector. It is supported by a two-years onsite warranty across India.
