

3D PRINTERS

3D printing is any of various processes in which material is joined or solidified under computer control to create a three-dimensional object, with material being added together. 3D printing is used in both rapid prototyping and additive manufacturing (AM). Objects can be of almost any shape or geometry and typically are produced using digital model data from a 3D model or another electronic data source such as an Additive Manufacturing File (AMF) file.

Rajguru Electronics (I) Pvt. Ltd. introduces 3D printers in India.

RG08

RG04

- Most cost-effective DIY prusa i3 kit2
- Hot sale with huge user group3
- Massive upgrades and instructive sources on Internet

- Easy to assemble in 10 mins
- Stable metal frame in triangle
- Metal Plate +Optical Axis makes printing smoothly and precisely
- New resolution of belt tension-you can adjust screw to tighten belt.
- Support remote feeding
- Support 0.1mm layer thickness

RG08

Structure	Acrylic Frame	Metal Plate +Optical Axis
Printable Size	220*220*240mm	200*210mm
Printing Resolution	±0.1-0.2mm	±0.1-0.15mm
Printer Size	500*400*450mm	330*640mm
Net Weight	8.5kg	6.8kg
Packing Size	510*310*208MM	610*340*165mm
Gross Weight	9kg	7.5kg
Power Supply	220V/110V 250W	220V/110V 250W
Printing Software	Cura	Cura, Repetier-Host
