radar, for early detection and tracking of air and surface targets, thereby enabling engagement of fire control systems to neutralise the same. RAWL-03 will be offered in both ship-borne and land-based configurations. The system is based on state-of-the-art GaN TR module technology and incorporates the latest signal processing techniques.

## Centralised monitoring system for LED streetlights in Hyderabad

Greater Hyderabad Municipal Corp. (GHMC) has aggregated the details of centralised control monitoring system (CCMS) for streetlighting across the city on a website, <http://120.138.9.117:8080/ghmc>, which gives zone-wise information about LED lights.

The website shows real-time details of CCMS-connected LED streetlights and their status. It also shows whether lights are on or off.

The task of maintaining this system has been given to Energy Efficiency Services Ltd (EESL). Any citizen can monitor or view the status of the LED lights via the given link on the website, and can lodge a complaint to the authorities concerned if they notice any malfunction at [helpline@eesl.co.in](mailto:helpline@eesl.co.in) or <http://support.eeslindia.org>

GHMC has installed about 406,729 LED lights in the last one year, across the city, and 24,800 LED streetlights are connected to the CCMS. These streetlights can also be switched on or off via CCMS.

## Exide Industries forms JV with Leclanché for India's EV market

Exide Industries Ltd (one of India's largest manufacturers of lead-acid batteries and power storage solutions providers) and Leclanché SA (one of the world's leading energy storage solution companies, headquartered in Switzerland) have announced a joint venture (JV) to build lithium-ion batteries and provide energy storage systems for India's EV market and other grid-based applications.

As part of the JV, Leclanché will provide access to its knowhow and intellectual property for lithium-ion cells, modules and battery management systems, and Exide Industries
