

Business Setup For PCB ASSEMBLY

Research Team,
ComConnect
Consulting

PCB assembly and design is a perfect opportunity for entrepreneurs who have a good electronics knowhow. This business can be started with a relatively small infrastructure and capital investment

Printed circuit boards (PCBs) are used in almost all electronic and electrical products, ranging from consumer gadgets such as PCs, tablets, smartphones and gaming consoles to industrial and high-tech products in strategic and medical electronics domains. These provide the base and connec-

tivity to various electronic components such as resistors, capacitors, coils, pots, diodes, transistors, ICs and transformers to complete the electronic circuit.

PCB assembly and design is a perfect opportunity for entrepreneurs who have a good electronics knowhow. This business can be started with a relatively small infrastructure and capital investment. In this article, we enlist the steps to set up a small-scale PCB assembly business.

Market potential

India is one of the fastest growing electronics market in the world and is anticipated to reach US\$ 400 billion in 2022, with domestic manufacturing climbing to over US\$ 100 billion. This staggering growth leads to immense potential for the PCB market.

According to an ELCINA study, domestic market demand for PCBs will grow annually at 20.56 per cent over the period 2015-20, and reach over US\$ 6 billion by 2020 from the current level of US\$ 2.38 billion (see table).

ESTIMATED DEMAND IN THE INDIAN PCB MARKET

(in US\$ million)

	CAGR 2015-20	2015-16	2016-17	2017-18	2018-19	2019-20
Automotive	34.82%	110	140	240	340	490
Mobile phones	23.58%	*	310	408	612	723
Strategic	21.64%	214	257	310	422	570
Industrial	17.99%	404	467	617	808	924
Telecom	16.34%	221	64	272	382	471
Consumer electronics	16.15%	790	950	1140	1380	1670
LED lighting	16.00%	400	470	570	690	840
Computer hardware	10.93%	250	80	310	360	420
Total	20.65%	2389	3138	3867	4994	6108
