

son's disease or other forms of motion disorders. Basically, it is a self-stabilising handle that stabilises up to 70 per cent of the disruption and helps reduce the spilling of contents from the utensil before food reaches the patient's mouth. It comes with a charger, three utensils, a spoon, a fork and a soup spoon. The handle can be wiped down, while spoons and the fork can be washed like normal utensils. One-time charge can last several meals. Liftware Level ensures the utensil stays steady and level as your hand moves and bends while Liftware Steady focuses to reduce the effects of hand shake.

Sesame Phone. Persons with limited mobility find it difficult to operate a normal phone. Designed for people with such disabilities, Sesame Phone is a touch-free smart-

phone. This phone can be operated with small head movements, tracked by its front-facing camera. So even without touching this device users can access all of its features. It is designed to recognise gestures for swipe, browse, play and more. Voice control provides a real hands-free experience on the phone.

Just speak the phrase "Open Sesame" into the mouth piece and your phone will switch on. As it gets activated, the front-facing camera starts tracking the position of your head. The cursor on the screen allows you to make calls, send texts and emails, and use apps. The camera sensitivity can be adjusted to suit the user. Turning your head right will send the cursor right, turning it to the left will send it to the left. Nodding up or down completes the simple navigation system. **EFY**

THE BUSINESS MAGAZINE FOR ELECTRONICS INDUSTRY

Launched in February 2007, Electronics Bazaar, India's first B2B magazine aims at promoting the electronics industry. It covers the latest products, news, views, insights, opinions, and market trends from electronic components, products and machinery to manufacturing equipments segments.
