

whereas 3D printers print pre-instructed design that you cannot change at the time of printing. Pens are easy to use and carry, while printers are heavy and need training on the software to use. In addition to the printer cost, there are expenses on refill, replacement and maintenance as well. That's why 3D printing pens are a good alternative to printers.

How to select a 3D printing pen

Before choosing a 3D pen, it's important to study its features and applications in depth. Check out the pen's weight and dimensions (especially if it is to be used by your kids), LCD, variety of colours in the filament, jam blocking system to prevent clogging and warranty period. The better the control your 3D pen gives you, the better is its quality.

Adjustable temperature and speed can make drawings more targeted and advanced. When the pen is in use for a long time, it might get hot and hurt the user. The display indicates that the pen is ready to use or that the temperature has increased beyond permissible limits.

There are various 3D printing pens available in the market. Here we list select few:

Leo Evs 3D Doodler. This pen comes with speed and temperature adjustment, colourful filaments and LCD screen. It weighs 77gm and measures 16x3x3.5cm³ dimensionally.

Scribbler V3. It offers the advantages of colourful filaments, large OLED screen, fast response and ergonomic design. It weighs just 64gm and measures 15.2x5x10cm³.

MYNT 3D. It features OLED screen and speed and temperature control. The nozzle can easily be removed and cleaned. The pen supports both PLA and ABS plastic filaments, and is ergonomically designed. It weighs only 36gm and measures 17.8x1.9x1.6cm³.

Soyan. It features slick design, smart standby switching function and adjustable temperature and speed, fast cooling technology and support

Scribbler V3

MYNT 3D

7Tech 3D printing pen

for ABS as well as PLA materials. It weighs 4.3kg (9.6lb) and measures 3x18.7x4.3cm³.

7Tech 3D printing pen. It features speed and temperature control, advanced unclogging system and aluminium spatula to protect from hot nozzle, and comes with one-year warranty. However, it is not easy to use. It weighs 63gm and measures 18.5x4x2.8cm³. **EFY**
