

INNOVATIVE GYM GEARS FOR A SMART WORKOUT

Paromik Chakraborty

Jabra Elite Sport

Gym accessories have seen some of the most innovative upgrades in the last few years. Fitness trackers are quite popular, but do you know there are more interesting gears—like a fluid container that tells whether you are hydrated enough,

or a gadget that can measure your muscle-to-fat ratio? Here are some of the most interesting gym gears that can prove to be super-beneficial.

Work out freely with wireless earbuds

Jabra Elite Sport is great for turning up the tunes without wires. Jabra puts great focus on the antenna and signal reception to remove the challenges of Bluetooth headset in sound reception. It maintains

the original audio quality and delivers impactful sound output with powerful bass, clear treble and all nuances well distinguished. Ear-buds are quite light and fit perfectly. The device is made of waterproof material and comes with 3-year warranty against sweat damage.

An assistive mobile application called **Hear Through** lets surrounding sound filter in to make you aware of your surroundings. The mobile application can also analyse your fitness metrics like heart rate, give insight on your health and provide personalised workout-coaching, which is audio-enabled! Jabra Elite Sport costs ₹ 16,000.

Another recommendable option is **Bose SoundSport Free**. Tuned to receive seamless audio stream via bluetooth without quality compression, it delivers the sound output level expected from Bose products. Lightweight yet durable, sweat- and water-resistant earpods deliver five hours of battery life at one go. The case itself is a portable charging dock. Bose SoundSport Free costs ₹ 19,000.
